interacting temporalities of infrastructural failure ecological deterioration and urban development He casts this predicament through the temporal lens of a meantime a managerial response that means a constant enduring of the present rather than progress toward a better future a chronic present Building on Borrowed Time takes us to a place where a flood crisis has already arrived where everyday residents are not waiting for the effects of climate change but are in fact already living with it and shows that life in coastal Southeast Asia is defined not by the temporality of climate science but by the lived experience of tidal flooding
