On Criticizing Music Five Philosophical Perspectives:

On Criticizing Music Kingsley Price, 1981 Musical Performance Stan Godlovitch, 2002-01-31 Most music we hear comes to us via a recording medium on which sound has been stored Such remoteness of music heard from music made has become so commonplace it is rarely considered Musical Performance A Philosophical Study considers the implications of this separation for live musical performance and music making Rather than examining the composition or perception of music as most philosophical accounts of music do Stan Godlovitch takes up the problem of how the tradition of active music playing and performing has been challenged by technology and what problems this poses for philosophical aesthetics Where does the value of musical performance lie Is human performance of music a mere transfer medium Is the performance of music more expressive than recorded music Musical Performance poses questions such as these to develop a fascinating account of music today musicians but via some recording medium on which sound has been stored *What Is Music?* Philip Alpers, 2010-11-01 *On the Nature of Musical Experience* Bennett Reimer, Jeffrey E. Wright, 1992 On the Nature of Musical Experience discusses the shared beliefs of twenty prominent aestheticians composers theorists and educators and identifies fourteen features of musical experience as widespread phenomenon *The Journal of Philosophy*, 1982 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933 *The Journal of Aesthetic Education*, 1992 Includes special issues *Music and the Aesthetics of Modernity* Karol Berger, Anthony Newcomb, 2005 This book encourages a debate over musical modernity a debate considering the question whether an examination of the history of European art music may enrich our picture of modernity and whether our understanding of music's development may be transformed by insights into the nature of modernity provided by other historical disciplines

Philosopher at the Keyboard Elizabeth Angillet, 1992-01-01 This is a provocative account of pianist Glenn Gould's intellectual and musical thought Gould was a philosopher who incessantly pursued wisdom through his art If the reader follows Gould's ardent campaign through the metaphorical thicket found in his ideas a compelling Gouldian model for a philosophy of music unfolds Gould argues that music is not only a reflection of social dynamics but could also be a tool for the betterment of society The original methodology conceived and implemented in this study contributes an important design for subsequent historical philosophical studies particularly in music education Inside the Music Business Michael Fink, 1989 Examining all aspects of the music industry functioning in contemporary American life this book heightens students awareness of the variety of musical experience available in everyday life and leads them from familiar subjects to the details of behind the scenes operations in the industry **Journal of Music Theory**, 1987 American Philosophical Quarterly Nicholas Rescher, 1984 **Research Guide to Musicology** James W. Pruett, Thomas P. Slavens, 1985 **Philosopher, Teacher, Musician** Estelle Ruth Jorgensen, 1991 **Music in Search of Itself** David B. Greene, 2005 Many contemporary composers and music critics say in an offhand way that all music written in the past quarter century is about music that it is

reflexive and self referential in some significant sense It is music in search of an understanding of itself This book tries to deepen the understanding of music about music as well as music itself in four ways First it puts music s own self understanding onto an equal footing with philosophical aesthetics of music It subjects pieces of music about music to close detailed analysis and puts the statements about the nature of music that emerge from these analyses into conversation with philosophical statements about music Second it investigates whether and in what way the concept of reflexive music makes sense and to what extent music about music is possible Third it inquires into the need for music to search for itself and evaluates the connection between this need and the European fascination and then disillusion with the concept of aesthetic experience self understanding that there are severe limits to the meaningfulness of music in general that it is thus impossible for music about music to be fully meaningful
