Simplicius: On Epictetus Handbook 27-53 Charles Brittain,Tad Brennan,2014-04-10 The Enchiridion or Handbook of the first century AD Stoic Epictetus was used as an ethical treatise both in Christian monasteries and by the sixth century pagan Neoplatonist Simplicius Simplicius chose it for beginners rather than Aristotle s Ethics because it presupposed no knowledge of logic We thus get a fascinating chance to see how a pagan Neoplatonist transformed Stoic ideas The text was relevant to Simplicius because he too like Epictetus was teaching beginners how to take the first steps towards eradicating emotion although he is unlike Epictetus in thinking that they should give up public life rather than acquiesce if public office is denied them Simplicius starts from a Platonic definition of the person as rational soul not body ignoring Epictetus further whittling down of himself to just his will or policy decisions He selects certain topics for special attention in chapters 1 8 27 and 31 Things are up to us despite Fate Our sufferings are not evil but providential attempts to turn us from the body Evil is found only in the human soul But evil is parasitic Proclus term on good The gods exist are provident and cannot be bought off With nearly all of this the Stoics would agree but for quite different reasons and their own distinctions and definitions are to a large extent ignored This translation of the Handbook is published in two volumes This is the second volume covering chapters 27 53 the first covers chapters 1 26 **Simplicius: On Epictetus Handbook 27-53** Simplicius (of

in the library of nations as a classic book most excellently adapted to direct the will to purify the heart and to confirm the understanding by a just confidence in the nature both of God and man Edward Gibbon This book written by a pagan philosopher makes the most Christian impression conceivable The betrayal of all reality through morality is here present in its fullest splendour pitiful psychology the philosopher is reduced to a country parson And Plato is to blame for all of it He remains Europe s greatest misfortune Fredrich Nietzsche Of these two rival reactions the favourable one was most common Epictetus Handbook on ethics was used in Christian monasteries and Simplicius commentary on it was widely available up to the nineteenth century The commentary gives us a fascinating chance to see how a pagan Neoplatonist transformed Stoic ideas adding Neoplatonist accounts of theology theodicy providence free will and the problem of evil This translation of the Commentary on the Handbook is published in two volumes This is the first covering chapters 1-26 the second covers chapters 27-53 **On Epictetus Handbook 27-53** Simplicius (of Cilicia.),2012 The Enchiridion or Handbook of the first century AD

Fate, Providence and Moral Responsibility in Ancient, Medieval and Early Modern Thought Pieter d'Hoine,Gerd Van Riel,2014-03-05 Essays on key moments in the intellectual history of the West This book forms a major contribution to the discussion on fate providence and moral responsibility in Antiquity the Middle Ages and Early Modern times Through 37 original papers renowned scholars from many different countries as well as a number of young and promising researchers write the history of the philosophical problems of freedom and determinism since its origins in pre socratic philosophy up to the seventeenth century The main focus points are classic Antiquity Plato and Aristotle the Neoplatonic synthesis of late Antiquity Plotinus Proclus Simplicius and thirteenth century scholasticism Thomas Aquinas Henry of Ghent They do not only represent key moments in the intellectual history of the West but are also the central figures and periods to which Carlos

Steel the dedicatory of this volume has devoted his philosophical career **A Vocabulary of the Ancient Commentators on Aristotle** Richard D. McKirahan, 2021-12-16 An astounding project of analysis on more than one hundred translations of ancient philosophical texts this index of words found in the Ancient Commentators on Aristotle series comprises some 114 000 entries It forms in effect a unique dictionary of philosophical terms from the post Hellenistic period through to late antiquity and will be an essential reference tool for any scholar working on the meaning of these ancient texts As traditional dictionaries have usually neglected to include translation examples from philosophical texts of this period scholars interested in how meanings of words vary across time and author have been ill served This index fills a huge gap therefore in the lexical analysis of ancient Greek and has application well beyond the reading of ancient philosophical commentaries Bringing together the full indexes from 110 of the volumes published in Bloomsbury's Ancient Commentators on Aristotle series McKirahan has combined each word entry and analysed how many times particular translations occur He presents his findings numerically so that each meaning in turn has a note as to the number of times it is used For meanings that are found between one and four times the volume details are also given so that readers may quickly and easily look up the texts themselves **The Sermon on the Mount and Spiritual Exercises** George Branch-Trevathan, 2020-03-31 What in Matthew's view should a human being become and how does one attain that ideal In The Sermon on the Mount and Spiritual Exercises The Making of the Matthean Self George Branch Trevathan presents a new account of Matthew's ethics and argues that the evangelist presents the Sermon on the Mount as functioning like many other ancient sayings collections that is as facilitating transformative work on oneself or spiritual exercises that enable one to realize the evangelist's ideals The conclusion suggests some implications for our understanding of ethical formation in antiquity and the study of ethics more generally This will be an essential volume for scholars studying the Gospel of Matthew early Christian ethics the relationships between early Christian and ancient philosophical writings or ethical formation in antiquity **The Philosophy of the Commentators, 200-600 AD: Psychology (with ethics and religion)** Richard Sorabji, 2005 This is the first work to draw on the four hundred years of transition from ancient Greek philosophy to the medieval philosophy of Islam and the West During this period philosophy was often written in the form of commentaries on the works of Plato and Aristotle Many ideas wrongly credited to the Middle Ages derive from these centuries such as that of impetus in dynamics and intentional objects in philosophy of mind The later Neoplatonist commentators fought a losing battle with Christianity but inadvertently made Aristotle acceptable to Christians by ascribing to him belief in a Creator God and human immortality The commentators provide a panorama of up to a thousand years of Greek philosophy much of which would otherwise be lost They also serve as the missing link essential for understanding the subsequent history of Western philosophy Volume 1 deals with psychology which for the Neoplatonist commentators was the gateway to metaphysics and theology It was the subject on which Plato and Aristotle disagreed most and on which the commentators went furthest beyond them in their search for

synthesis Ethics and religious practice fall naturally under psychology and are included in this volume All sources appear in English translation and are carefully linked and cross referenced by editorial comment and explanation Bibliographies are provided throughout

The Philosophy of the Commentators, 200-600 AD: Physics Richard Sorabji, 2005 Physics in Neoplatonist thought the subject which occupies the second volume of this sourcebook was innovative the world of space and time was causally ordered by a nonspatial nontemporal world and this view required original thinking

Philosophy, Science and Exegesis in Greek, Arabic and Latin Commentaries Peter Adamson, Han Baltussen, Martin William Francis Stone, 2004 This two volume Supplement to the Bulletin of the Institute of Classical Studies represents the proceedings of a conference held at the Institute on 27-29 June 2002 in honour of Richard Sorabji These volumes which are intended to build on the massive achievement of Professor Sorabji's Ancient Commentators on Aristotle series focus on the commentary as a vehicle of philosophical and scientific thought Volume One deals with the Greek tradition including one paper on Byzantine philosophy and one on the Latin author Calcidius who is very close to the late Greek tradition in outlook The volume begins with an overview of the tradition of commenting on Aristotle and of the study of this tradition in the modern era It concludes with an up to date bibliography of scholarship devoted to the commentators
