On Essence:

Lovers in Essence Sharon Krishek, 2022 Romantic love is a defining phenomenon in human existence and an object of heightened interest for literature art popular culture and psychology. But what is romantic love and why is it typically experienced as so significant to our existence? Using central ideas from the philosophy of Søren Kierkegaard as well as engaging with contemporary discussions in the philosophy of love this book explores the nature of romantic love and philosophically substantiates its meaningfulness to an individual's life. It does so by developing a connection between love and selfhood here explained in terms of one's distinct individuality. To be a self it is claimed is to possess a name that is an individual essence. Further the book argues it is when we love that we regard people by their names we respond to who they truly are. Accordingly the idea anchoring the book is that love is a correspondence between essences if Jane loves Edward she responds to him being who he is by virtue of her being who she is. The conception of being thus correspondent has important implications as to the moral and spiritual value of romantic love. Relying on Kierkegaard's analysis of the self of faith and of love even if sometimes in a way that departs from Kierkegaard's explicit position the book explores these implications. By doing this it construes romantic love as a desirable phenomenon emotionally morally and spiritually
