Mastering Photographic Composition, Creativity, and Personal Style Alain Briot,2010-12-14 Alain Briot states that The personality of the photographer must be present in the image for an artistic photograph to have value And in this book he sets out to teach the things that are essential in achieving this goal Following his successful first book Mastering Landscape Photography Briot goes beyond the conventional rules of composition and takes on a fresh new approach to teaching the art of photography Based upon his personal experiences as an artist teacher and photographer he opens new doors to the reader doors leading to new ways of seeing and composing images Briot approaches fine art photography as being a combination of art and technique In this new book he addresses both of these by presenting artistic and technical information On the artistic side Briot introduces artistic concepts that have been rarely if ever associated with photography On the technical side he presents numerous tools that can help you learn how to create better photographs and provides technical solutions to common photographic problems The author practices photography as a fine art What matters most to him is how photography can be used to express feelings and emotions For Briot a good photograph must be both artistically inspired and technically excellent To have just one of these two elements is not enough for a fine art photograph to be successful Topics include How to compose with color with black and white and with light Why you need to consider your audience while composing a photograph Recreate the emotions you felt when you captured your photographs How the elements of color hue contrast and saturation work in your images How to control the elements that have a visual effect in your photographs How to draw upon your personal way of seeing and then share your vision How to diagnose image maladies and apply the proper remedies How to define a color palette for a specific photograph How to use compositional elements to develop a personal style Forweword by Tony Sweet

Photographic Ernesto Martinez, 2022-09-05 Knowing how to compose in photography is having more than halfway to becoming a good photographer. If you are interested, we are going to recapitulate the basic notions of photographic composition. Mastering composition is just as important as mastering lighting or the parts and handling of your photographic equipment. It can make the difference between an ordinary photo and a great professional-looking photo. In the following pages, we will analyze various rules, tricks, and tips to take the best photographs in terms of Composition. We will know the laws of perception, who are the Gestalt psychologists, and what relationship they have with photography. We will study the law of figure and background, the law of proximity, the law of continuity, the law of closure, the law of similarity, and the law of grouping, among others. All of them are rules of perception that help us understand why some photos are better than others and how the visual stimulus that the photographer captures in the image affects the viewer. We will explain in depth the basic laws of photographic composition: the law of the horizon, the law of the gaze, and of course the famous rule of thirds. Nor will we forget the golden section, the Fibonacci sequence, and its relationship with photographic composition. We will continue talking in detail about the elements that make up the design in an image: what they are and how we can use them in our favor when composing a good photograph. Lines and points, shapes, textures, and colors are all concepts that we will get to know in depth in this book, and that will serve as a guide when taking out the camera and composing. Finally, we will review the types of framing, explaining what values the different ways of framing add to the image. We will review the photographic angle and the planes of the image and perspective, all of which are aspects to take into account in a good photographic composition. If you want to become a better photographer, get better photos, incredible photos, you don't need to wait for a better team. You can greatly improve your photography, climb a privileged level, by learning the laws and concepts of Composition and visual language.
