## **On Secularization Towards A Revised General Theory:**

On Secularization David Martin, 2017-03-02 Secularization has been hotly debated since it was first subjected to critical attention in the mid sixties by David Martin before he sketched a General Theory in 1969. On Secularization presents David Martin's reassessment of the key issues with particular regard to the special situation of religion in Western Europe and questions in the global context including Pentecostalism in Latin America and Africa. Concluding with examinations of Pluralism, Christian Language and Christianity and Politics, this book offers students and other readers of social theory and sociology of religion an invaluable reappraisal of Christianity and Secularization. It represents the most comprehensive sociology of contemporary Christianity set in historical depth.

The Future of Christianity David Martin, 2016-03-16 This book offers a mature assessment of themes preoccupying David Martin over some fifty years complementing his book On Secularization. Deploying secularisation as an omnibus word bringing many dimensions into play, Martin argues that the boundaries of the concept of secularisation must not be redefined simply to cover aberrant cases as when the focus was more on America as an exception rather than on Europe as an exception to the furiously religious character of the rest of the world. Particular themes of focus include the dialectic of Christianity and secularization, the relation of Christianity to multiple enlightenments and modes of modernity, the enigmas of East Germany and Eastern Europe and the rise of the transnational religious voluntary association including Pentecostalism as that feeds into vast religious changes in the developing world. Doubts are cast on the idea that religion has ever been privatised and has lately reentered the public realm. The rest of the book deals with the relation of the Christian repertoire to the nexus of religion and politics including democracy and violence and sharply criticises polemical assertions of a special relation of religion to violence and explores the contributions of cognitive science to the debate.

*Interpreting Charles Taylor's Social Theory on Religion and Secularization* Germán McKenzie, 2016-11-22 This book examines Tayloorean social theory, its sources, main characteristics and impact. Charles Taylor's meta-narrative of secularization in the West, prominently contained in his major work *A Secular Age* (2007), has brought new insight on the social and cultural factors that intervened in such process, the role of human agency and particularly on the contemporary conditions of belief in North America and Europe. This study discusses what Taylor's approach has brought to the scholarly debate on Western secularization, which has been carried on mostly in sociological terms. McKenzie interprets Taylor's views in a way that offers an original social theory. Such interpretation is possible with the help of sociologist Margaret Archer's morphogenetic theory and by making the most of Taylor's particular understanding of the method of the social sciences and of his philosophical views on human beings' knowledge and modernity. After exploring the philosophical and sociological sources informing Tayloorean social theory and proposing its basic concepts and hermeneutic guidelines, the author compares it with two widespread theories of secularization: the now waning orthodox account and that proposed by Rational Choice Theory scholars, particularly prevalent in the United States. In doing so, the book shows in which ways

Taylorian social theory supersedes them what new issues it brings into the scholarly discussion and what difficulties might limit its future development **Periodizing Secularization** Clive D. Field, 2019 Moving beyond the now somewhat tired debates about secularization as paradigm theory or master narrative Periodizing Secularization focuses upon the empirical evidence for secularization viewed in its descriptive sense as the waning social influence of religion in Britain Particular emphasis is attached to the two key performance indicators of religious allegiance and churchgoing each subsuming several sub indicators between 1880 and 1945 including the first substantive account of secularization during the fin de siecle A wide range of primary sources is deployed many of them relatively or entirely unknown and with due regard to their methodological and interpretative challenges On the back of them a cross cutting statistical measure of active church adherence is devised which clearly shows how secularization has been a reality and a gradual not revolutionary process The most likely causes of secularization were an incremental demise of a Sabbatarian culture coupled with the associated emergence of new leisure opportunities and transport links and of religious socialization in the church at home and in the school The analysis is also extended backwards to include a summary of developments during the eighteenth and early nineteenth centuries and laterally to incorporate a preliminary evaluation of a six dimensional model of diffusive religion demonstrating that these alternative performance indicators have hitherto failed to prove that secularization has not occurred The book is designed as a prequel to the author's previous volumes on the chronology of British secularization Britain's Last Religious Revival 2015 and Secularization in the Long 1960s 2017 Together they offer a holistic picture of religious transformation in Britain during the key secularizing century of 1880-1980 A General Theory of Secularization David Martin, 1978-01-01

Theology and Society in Three Cities Mark D Chapman, 2014-10-30 Oxford Berlin and Chicago were extraordinarily dynamic centres of theology during the nineteenth and early twentieth centuries However significant differences in the political climate and culture of each location bred strikingly divergent theological approaches in the universities of each city Mark Chapman offers a highly original exploration of the subjection of their theologies to the changes and developments of educational policy and national and international politics shedding light upon the constraints that such external factors have imposed upon the evolution of the discipline Chapman highlights the efforts of theologians and churchmen to relate the true core of Christianity a lived religion free of shibboleths to their rapidly changing world The opinions of conservative and liberal theologians are skilfully balanced to reveal the problems of critical history of political authority of increasing global awareness and of the need for social amelioration which profoundly shaped the ways in which theology was conceived during the period New ground has been broken in this interdisciplinary study of the social political and ecclesiastical contexts of Western theology This book will be invaluable to any reader interested in the use of theology as part of the wider quest for social integration and meaning in an increasingly fragmented society On Secularization David Martin, 2005 Subjects covered in this volume include Christian language and its nature and the engagement of Christianity

**Christian Faith and Scholarship: An Exploration of Contemporary Developments** Todd C.

Ream,Perry Lynn Glanzer,2007-09-17 In the twenty first century religious faith has reemerged from the margins of modernism and moved back to the center of contemporary scholarly conversations When Jacques Derrida died Stanley Fish recently wrote I was called by a reporter who wanted to know what would succeed high theory and the triumvirate of race gender and class as the center of intellectual energy in the academy I answered like a shot religion A group of evaluators of the Lilly Endowment s Initiative on Religion and Higher Education recently agreed There is today more discussion about the role of religion in the academy than at any time in the past 40 years and more commitment to the project of Christian higher education than there was just ten years ago In recognition of these developments this particular monograph offers an overview of the various ways conversations about religion and religiously informed scholarship are increasing in the academy Although a growing number of faith traditions are finding their place in this conversation the Christian tradition in its various forms is still the dominant voice This monograph addresses the history of secularization in American higher education and scholarship the historical and resistance by dominant religious traditions to that secularization the contemporary ways that individual scholars networks and institutions approach the question of religious faith and scholarship the concerns such a question raises for academic freedom and the relationship between religious faith and scholarship
