## **Omega Point:**

*The Omega Point* Mike Hockney, 2013-09-30 History's biggest lie is that there's one God and he created the universe out of nothing. Nothing has done more damage to the human psyche than monotheism the doctrine of an all powerful Spy God the divine peeping Tom who sentences to hell anyone who doesn't slavishly obey him. In fact the universe is a mathematical God factory and creates infinite Gods over eons of time. The universe via dialectical ontological mathematics is converging on the perfect answer to everything the condition known as the Absolute or the Omega Point. The universe travels mathematically from Alpha to Omega from perfect potential to perfect actualization. The ancient secret society of the Illuminati has waged a war against Abrahamic monotheism and promoted the doctrine of becoming God. Mathematics is the Philosopher's Stone that can transmute base metal ordinary humans into gold Gods. You too can complete your cosmic journey across countless reincarnations. Are you ready to become an Omega Human?

*The Omega Point* George Zebrowski, 1972      **The Omega Point** John R. Gribbin, 1988      **The Physics of Immortality** Frank J. Tipler, 1997-09-18 Is there a higher power in the universe? What happens to us when we die? Leading physicist Frank J. Tipler tackles these questions and more in an astonishing and profoundly important book that scientifically proves the existence of God and the physical resurrection of the dead.

**The God Factory** Mike Hockney, 2011-10-23 Illumination the religion of the Ancient Order of the Illuminati began with Pythagoras and is the world's only Logos religion i.e. a rational religion founded on mathematics science and philosophy. It has no connection with Mythos religions such as Judaism Christianity and Islam. Illumination is the Grand Unified Theory of Everything linking science religion psychology philosophy and even the paranormal. It does so via the only medium of truth and absolute knowledge mathematics which Pythagoras enigmatically declared to be the arche the fundamental substance of existence. Whereas science is based on mathematical materialism Illumination uses Leibnizian mathematical idealism. This is one of a series of books providing the ultimate answers to the nature of existence.

*Beyond the Big Bang* Willem B. Drees, 1990 Originally presented as the author's thesis doctoral University of Groningen Includes bibliographical references p 291-316 and index

*The Omega Point* John Gribbin, 1992-06-01      **The Omega Point Trilogy** George Zebrowski, 2014-04-01 The classic space opera trilogy from the John W. Campbell Memorial Award winning writer one of SF's most visionary authors Asimov's Science Fiction Magazine First published between 1977 and 1983 the novels Ashes and Stars The Omega Point and Mirror of Minds formed a trilogy that stands as one of the highpoints of that era in our genre dazzling Paul Di Filippo Locus Now in one volume The Omega Point Trilogy shares George Zebrowski's mind blowing prescience with a new generation of fans. 6599 A.D. The war between the Earth Federation and the Herculean Empire has been over for more than three centuries. The planet in the Hercules Globular Cluster is a cinder and the few descendants of the surviving Herculeans live half a galaxy away on Myraa's World in what seems to be a religious commune. But on an unnamed planet deep within the Hercules Cluster two survivors father and son gather their resources and plan a reign of

terror against Federation worlds The woman Myraa has a different vision though one which excludes empires and warring armies Subtly she strives to shape events toward a different end Rising to one of the most unusual climaxes in recent fantastic literature this trilogy of chase and vengeance depicts a colorful poetic future struggling to overcome its past Filled with striking twists and vivid ideas this is space opera at its most modern An impressive achievement an exciting story which also shows that man's future control of the environment even of his own body and mind will scarcely bring control of himself

Poul Anderson **Believing in Dawkins** Eric Steinhart,2020-09-16 Dawkin's militant atheism is well known his profound faith less well known In this book atheist philosopher Eric Steinhart explores the spiritual dimensions of Richard Dawkins books which are shown to encompass the meaning and purpose of life an appreciation of Platonic beauty and truth a deep belief in the rationality of the universe an aversion to both scientism and nihilism As an atheist Dawkins strives to develop a scientific alternative to theism and while he declares that science is not a religion he also proclaims it to be a spiritual enterprise His books are filled with fragmentary sketches of this spiritual atheism resembling a great unfinished cathedral This book systematises and completes Dawkins arguments and reveals their deep roots in Stoicism and Platonism Expanding on Dawkins ideas Steinhart shows how atheists can develop powerful ethical principles compelling systems of symbols and images and meaningful personal and social practices Believing in Dawkins is a rigorous and potent entreaty for the use of science and reason to support spiritually rich and optimistic ways of thinking and living

**Beginning With the End** Carol Rausch Albright,Joel Haugen,1997 Wolfhart Pannenberg has been a significant voice in the dialogue between religion and science This collection addresses his position therein and analyzes various topics from behavioural genetics to evolutionary ecology

**POINT OMEGA POINT** - John O'Loughlin,2022-04-29 POINT OMEGA POINT The Omega Standpoint continues the quest for cyclical or metaphysical perfection from where Freedom and Determinism leaves off and does so with even greater depth and confidence in its handling of the largely gender conditioned distinction between Nature and Civilization on both sensual and sensible terms thereby bringing the ideological philosophy of Social Transcendentalism to a kind of omega point in its own right

*Reflections on the Journey to the Omega Point* Tom Reidy,2017-05-30 Reflections on the Journey to the Omega Point is a collection of random thoughts in no particular order that I have been amassing and collecting over the past 70 years on a variety of subjects It is a representation of my philosophy of life that we are on a journey or a pilgrimage if you will through a hostile insecure and uncertain world on the way to the Omega Point death the portal to Heaven our eternal home where there will be eternal happiness security and certainty in an infinitely loving environment presided over by an infinitely loving God Whatever happens to us here is important only insofar as it contributes to our place in that world beyond the Omega Point Only one thing is important Eternal Salvation in an eternal Paradise with an eternal God Some of the concepts will be repeated throughout the book but they are important enough to bear repetition as they fall into the context of various different essays I admit that I have grown more cynical as I have grown older but the world we live in is becoming

increasingly conducive to cynicism I'll warn the reader now that this is a very dark book in many ways but it is a realistic book written from a Roman Catholic perspective and viewpoint All Scriptural quotes are taken from the on line version of the Douay Rheims Bible Further Reflections on the Journey to the Omega Point Tom Reidy, Further Reflections on the Journey to the Omega Point is a sequel to my previous book Reflections on the Journey to the Omega Point It is a further collection of my reflections on various subjects based on insights I have gained over 71 years of living They follow no particular pattern or sequence and at times may be repetitious but some things are worth repeating since they contain valuable lessons and wisdom that come to all of us over a lifetime of living This book is written from a Roman Catholic viewpoint but it has something for people of all Faiths One disclaimer These are strictly my observations and opinions right or wrong these are my personal conclusions on the topics discussed God, Creation, and Contemporary Physics Mark William Worthing,1996 Worthing describes the critique of traditional arguments for God's existence by physicists He then examines three Christian doctrines in light of theoretical physics God and creation out of nothing in relation to the Big Bang Theory God and continuing creation in relation to field theory Bell's theorem providence entropy and theodicy and God and the consummation of creation Islamic Studies ,1996 The Omega Point and Teilhard de Chardin Marco A.
