International English Language Testing System Target 6.5 Chris Gough, 2013 IELTS Target 6.5 Preparation for IELTS Academic IELTS Target 6.5 is aimed at students entering IELTS study at intermediate level. The main focus of preparation is the IELTS Academic examination; therefore, this book is ideal for those seeking to gain accreditation for university admissions or for immigration purposes. The combined IELTS Target 6.5 Course Book and Workbook teaches language competencies rather than focusing solely on exam preparation. The course consists of three four-unit sections that take the student from an intermediate to advanced level. Each unit focuses on developing vocabulary and key language skills in all four areas: speaking, listening, reading, and writing. The Workbook provides additional practice to help consolidate learning. By the end of the course, students will be working with texts and language at an advanced level. Each unit consists of five modules: 1 Speaking and Vocabulary. This prepares students for the type of interaction they can expect with the examiner in the Speaking test. The vocabulary selected is that most frequently encountered during the speaking exam. 2 Listening. This module is in two parts. The first part engages students in a topic and pre-teaches key vocabulary before focusing on a key skill or particular IELTS exam technique. The second part practises the skill. 3 Reading. As with the Listening Module. 4 Writing. This deals with both parts of the Writing test, each unit focusing on a different writing skill or writing technique. There is a focus on guided writing with model compositions for all writing tasks. 5 Consolidation and Exam Practice. The first part revises the speaking focus and vocabulary in the first module. The second part practises listening, reading, or writing skills under exam-type conditions. The course also includes end-of-section review material. See accompanying Teacher's Book.

Ethics in Applied Linguistics Research Peter I. De Costa, 2015-10-16 Ethics in Applied Linguistics Research explores how ethical issues are negotiated in different areas of language research, illustrating for graduate students in applied linguistics the ethical dilemmas they might encounter in the research methodology classroom and how they might be addressed. This volume serves to demystify the complex ethical decision-making process by its accounts of renowned researchers' ethical practices as they transpired on the ground and how they negotiated externally imposed research codes. The collection investigates and records the research practices of prominent international applied linguists from a wide variety of subdisciplines, including discourse analysis, educational linguistics, heritage and minority education, language planning and policy, language and technology, literacy, second language acquisition, second and foreign language pedagogy, and sociolinguistics. By problematizing research practices that draw on a range of methodologies, Ethics in Applied Linguistics Research puts front and center the urgency to prepare the next generation of applied linguists with the tools and knowledge necessary to conduct ethical research in an increasingly globalized and networked world.

Linguistics and Language Behavior Abstracts, 2008-02

Achieve IELTS 2 Louis Harrison, Caroline Cushen, Susan Hutchinson, 2013
