*Evolution of Alienation* Lauren Langman,Devorah Kalekin-Fishman,2006 Building on the Marxian view of alienation as the inevitable consequence of wage labor that divests human beings of control over their life forces The Evolution of Alienation provides new insights into contemporary conditions Contributors explore how alienation is fostered not only by television freak shows and shock music but also by programmed schooling and even by some scientific theories Others show that the contradictory relationships possible in some domains among them new technologies and domestic work disclose niches of fulfillment that belie alienation *Foucault's Discipline* John S. Ransom,1997-01-14

In Foucault s Discipline John S Ransom extracts a distinctive vision of the political world and oppositional possibilities within it from the welter of disparate topics and projects Michel Foucault pursued over his lifetime Uniquely Ransom presents Foucault as a political theorist in the tradition of Weber and Nietzsche and specifically examines Foucault s work in relation to the political tradition of liberalism and the Frankfurt School By concentrating primarily on Discipline and Punish and the later Foucauldian texts Ransom provides a fresh interpretation of this controversial philosopher s perspectives on concepts such as freedom right truth and power Foucault s Discipline demonstrates how Foucault s valorization of descriptive critique over prescriptive plans of action can be applied to the decisively altered political landscape of the end of this millennium By reconstructing the philosopher s arguments concerning the significance of disciplinary institutions biopower subjectivity and forms of resistance in modern society Ransom shows how Foucault has provided a different way of looking at and responding to contemporary models of government in short a new depiction of the political world *Non-Linear Perspectives on Teacher Development* Kathryn J.

Strom,Tammy Mills,Linda Abrams,2023-03-21 Despite the multifaceted complexity of teaching dominant perspectives conceptualize teacher development in linear dualistic transactional human centric ways The authors in this book offer non linear alternatives by drawing on a continuum of complex perspectives including CHAT complexity theory actor network theory indigenous studies rhizomatics and posthuman neomaterialisms The chapters included here illuminate how different ways of thinking can help us better examine how teachers learn relationally with human material and discursive elements and offer ways to understand the entangled nature of the relationship between that learning and what emerges in classroom instructional practice They also present situated illustrations of what those entanglements or assemblages look like in the preservice induction and inservice phases from early childhood to secondary settings and across multiple continents Authors provide evidence that research on teacher development should focus on process as much if not more than product and show that complexity perspectives can support forward thinking assets based pedagogies Methodologically the chapters encourage

conceptual creativity and expansion and support an argument for blurring theory method and normalising methodological hybridity Ultimately this book provides conceptual theoretical and methodological tools to understand current educational conditions in late capitalism and imagine otherwise It was originally published as a special issue of the journal Professional Development in Education    **Walter Benjamin on Experience and History** Jasiel César,1992 This study is a textual analysis with sociological intentions of the contributions of Walter Benjamin s thought on the contemporary task of constructing social theory    **Paperbound Books in Print** ,1992    *Critical Theory and the Human Condition* Michael A.
