Headrick,2020 Since the appearance of *Homo sapiens* on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment Humans versus Nature tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn

harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past [Nature in the Round](#) Nigel Calder,1974 **The**

**Nature, Environment, and Activism in Nigerian Literature** Sule E. Egya,2020-03-24 Nature Environment and Activism in Nigerian Literature is a critical study of environmental writing covering a range of genres and generations of writers in Nigeria With a sustained concentration on the Nigerian experience in postcolonial ecocriticism the book pays attention to textual strategies as well as distinctive historicity at the heart of the ecological force in contemporary writing Focusing on nature the environment and activism the author decentres African ecocriticism affirming the eco social vision that

differentiates environmental writing in Nigeria from those of other nations on the continent. The book demonstrates how Nigerian writers beyond connecting themselves to the natures of their communities respond to ecological problems through indigenous literary instrumentalism. Anchored on the analytical concepts of nature environment and activism the study is definitive in foregrounding the contribution of Nigerian writing to studies in ecocriticism at continental and global levels. This book will be of interest to scholars of African and Postcolonial literature, ecocriticism and the environmental humanities.

**Down to Earth** Theodore Steinberg, 2019 In this ambitious and provocative text environmental historian Ted Steinberg offers a sweeping history of the United States a history that places the environment at the very center of the narrative. Now in a new edition *Down to Earth* reenvisiones the story of America from the ground up. It reveals how focusing on plants, animals, climate and other ecological factors can radically change the way that we think about the past. Examining such familiar topics as colonization, the industrial revolution, slavery, the Civil War and the emergence of consumer culture, Steinberg recounts how the natural world influenced the course of human history. From the colonists attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good, he reminds readers that many critical episodes in U.S. history were in fact environmental events. The text highlights the ways in which Americans have attempted to reshape and control nature from Thomas Jefferson's surveying plan which divided the national landscape into a grid to the transformation of animals, crops and even water into commodities.

**Re-Imagining Nature** Alfred Kentigern Siewers, 2013-12-24 *Re Imagining Nature* Environmental Humanities and Ecosemiotics explores new horizons in environmental studies which consider communication and meaning as core definitions of ecological life essential to deep sustainability. It considers landscape as narrative and applies theoretical frameworks in eco phenomenology and ecosemiotics to literary, historical and philosophical study of the relationship between text and landscape. It considers in particular examples and lessons to be drawn from case studies of medieval and Native American cultures to illustrate in an applied way the promise of environmental humanities today. In doing so it highlights an environmental future for the humanities on the cutting edge of cultural endeavor today.

**Interpreting Nature** I. G. Simmons, 2013-01-11 Human society has constructed many varied notions of the environment. Scientific information about the environment is often seen as the only worthwhile knowledge. This ignores the complexities created by interaction between people and the environment. Idealist thinking argues that everything we know is based on a construct of our minds and that all is possible. Can both be correct and true? *Interpreting Nature* explores the position of humanity in the environment from the principle that the models we construct are imperfect and can only be provisional. Having examined the way in which the natural sciences have interrogated nature, the types of data produced and what they mean to us, this looks at the environment within philosophy and ethics, the social sciences and the arts and analyses their role in the formation of environmental cognition.

**Nature Stories** James Shanahan, Katherine McComas, 1999 This volume seeks to examine the role of the mass media especially television in the

construction of the environment It studies the effects from television s messages about the environment and how journalism deals with environmental issues **Reclaiming Nature** James K. Boyce,Sunita Narain,Elizabeth A. Stanton,2007-06-07

In Reclaiming Nature leading environmental thinkers from across the globe explore the relationship between human activities and the natural This is a bold and comprehensive text of major interest to both students of the environment and professionals involved in policy making

**Thinking like a Mall** Steven Vogel,2016-09-02 A provocative argument that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the built environment Environmentalism in theory and practice is concerned with protecting nature But if we have now reached the end of nature as Bill McKibben and other environmental thinkers have declared what is there left to protect In Thinking like a Mall Steven Vogel argues that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the environment that is the world that actually surrounds us which is always a built world the only one that we inhabit We need to think not so much like a mountain as Aldo Leopold urged as like a mall Shopping malls too are part of the environment and deserve as much serious consideration from environmental thinkers as do mountains Vogel argues

provocatively that environmental philosophy in its ethics should no longer draw a distinction between the natural and the artificial and in its politics should abandon the idea that something beyond human practices such as nature can serve as a standard determining what those practices ought to be The appeal to nature distinct from the built environment he contends may be not merely unhelpful to environmental thinking but in itself harmful to that thinking The question for environmental philosophy is not how can we save nature but rather what environment should we inhabit and what practices should we engage in to help build it

*Science and Nature* Carolyn Merchant,2017-11-07 Science and Nature brings together the work and insights of historian Carolyn Merchant on the history of science environmental history and ethics The book explores her ideas about the interconnections among science women nature and history as they have emerged over her academic lifetime Focusing on topics such as The Death of Nature the Scientific Revolution women in the history of science and environment and partnership ethics it synthesizes her writings and sets out a vision for the twenty first century Anyone interested in the interactions between science and nature in the past present and future will want to read this book It is an ideal text for courses on the environment environmental history history of science and the philosophy of science
