Provided by publisher [Leveraging Phenotyping and Crop Modeling in Smart Agriculture](#) Ting Sun,Wenyu Zhang,Syed Tahir Ata-Ul-Karim,Yuntao Ma, Liujun Xiao,2025-08-20 In recent years the agriculture sector has witnessed a significant transformation due to the integration of digital technologies and data driven methodologies leading to the emergence of smart agriculture Advanced agricultural technologies notably high throughput phenotyping and crop modeling have fundamentally altered our understanding and management of crops Phenotyping allows for precise characterization of plant

traits while crop modeling provides predictive insights into crop growth and yield based on a diverse set of environmental parameters. In many contexts phenotyping and modeling are closely intertwined. Phenotypic data forms the foundation for modeling and models offer quantifiable tools for analyzing complex traits. The convergence of these domains presents an exciting opportunity to optimize agricultural practices, enhance resource efficiency and make substantial contributions to global food security. This research topic aims to seamlessly integrate phenotyping and modeling essential components in smart agriculture to address urgent challenges like sustainable food production amidst a growing global population and to optimize resource utilization. The key challenge is the fragmented use and insufficient integration of high throughput phenotyping and advanced crop modeling. The cohesive fusion of these technologies can revolutionize crop management offering predictive analytics for optimized resource allocation, enhanced productivity and environmental sustainability. Recent strides in sensor tech, machine learning and computational modeling provide a strong foundation for a refined integration of phenotyping and modeling, enabling real time data driven decisions for farmers. This research strives to bridge the gap between phenotyping and crop modeling, aiming for a transformative approach in smart agriculture to ensure sustainability and food security.

Building a fully engaged, energized workforce is the key to business success. *The Power of Thanks* reveals how leading companies like Intuit, JetBlue Airways, IHG, Symantec, ConAgra Foods and The Hershey Company empower employees through social recognition in which the practice of mutual appreciation and trust directs and rewards higher performance. Eric Mosley and Derek Irvine, executives at the world renowned employee recognition firm, Globoforce, explain why social recognition is so powerful and how you can apply it in your company. Case by case they show how a carefully planned and consistently executed Culture of Recognition business strategy inspires greater employee engagement and loyalty. Mosley and Irvine provide practical advice and proven examples for devising a powerful growth generating strategy that modernizes employee recognition for today's social, global, multi generational and 24x7 wired workforce. When employees participate in a culture that makes everyone a stakeholder in the organization's success, positive energy spreads like wildfire and business results follow.
