Managing Imitation Strategies:

Managing Imitation Strategies Steven P. Schnaars, 2002-04-29 Pioneers those innovative first movers who enter markets before competitors are often deified as engines of economic growth while imitators are generally scorned as copycats and shameful followers But who most often wins Drawing on seven years of research Steven Schnaars documents that in sharp contrast to conventional beliefs imitators commonly surpass pioneers as market leaders and attain the greatest financial rewards How do they do it In this ground breaking book the first to formulate imitation strategies for managers Schnaars systematically examines 28 detailed case histories from light beer to commercial jet liners in which imitators such as Anheuser Busch and Boeing prevailed over pioneers He describes the marketing wars court battles and even personal vendettas that often resulted and shows that imitators have several clear advantages Pioneers are forced to spend heavily on both product and market development They also risk making costly mistakes Pioneers often aid in their own destruction thrown into confusion by rapid growth internal bickering and the neverending search for expansion capital Moreover imitators do not have to risk expensive start up costs or pursuing a market that does not exist enabling them to quickly outmaneuver pioneers once the market is finally shaped By patiently waiting on the sidelines while the innovator makes the mistakes imitators can also usurp benefits from the test of time major defects in the product having been removed by the pioneer at an earlier stage in the game Schnaars discusses the three basic strategies that successful imitators such as Microsoft American Express and Pepsi have used to dominate markets pioneered by others First some imitators sell lower priced generic versions of the pioneer's product once it becomes popular as Bic did with ballpoint pens Second some firms imitate and improve upon the pioneer's product for example WordPerfect in the case of word processing software Third building on their capital distribution and marketing advantages that smaller pioneers cannot hope to match imitators use the most prevalent strategy of all bullying their way into a pioneer's market on sheer power In several cases a one two punch or combination of strategies is often utilized by the imitator to remove any doubt regarding their dominance in the market and in the eyes of the public Schnaars concludes that the benefits of pioneering have been oversold and that imitation compels recognition as a legitimate marketing strategy It should be as much a part of a company's strategic arsenal as strategies for innovation

Exploiting Intellectual Property To Promote Innovation And Create Value Joe Tidd, 2017-10-05 There are two traditional views of the role of intellectual property IP within the field of innovation management in innovation management research as an indicator or proxy for innovation inputs or outputs e g patents or licensing income or in innovation management practice as a means of protecting knowledge Exploiting Intellectual Property to Promote Innovation and Create Value argues that whilst both of these perspectives are useful neither capture the full potential contribution of intellectual property in innovation management research and practice The management of IP has become a central challenge in current strategies of Open Innovation and Business Model Innovation but there is relatively little empirical work available Theoretical arguments and empirical research suggest that from both an innovation policy and management perspective the challenge is to use IP to encourage risk taking and innovation and that a broader repertoire of strategies is necessary to create and capture the economic and social benefits of innovation This book identifies how intellectual property can be harnessed to create and capture value through exploiting new opportunities for innovation It is organized around three related themes public policies for IP firm strategies for IP and creating value from IP and offers insights from the latest research on IP strategies and practices to create and capture the economic and social benefits of innovation
