Dhillon, 2009-04-08 Of the billions of dollars spent on plant management and operation annually an estimated 80% of the total amount is spent to rectify the chronic failure of systems machines and humans Although information on human reliability error and human factors in engineering maintenance is scattered throughout journals and proceedings no single resourc Individual Latent Error Detection (I-LED) Justin R.E. Saward, Neville A. Stanton, 2018-12-07 Undetected human error in aircraft maintenance creates a latent error condition that can contribute to undesirable outcomes Individual Latent Error Detection I LED acts as an additional system safety control that helps an engineer recall past errors through environmental cues This book addresses a gap in the human factors research and current safety strategies by exploring the nature and extent of I LED and its benefit to safety resilience The book will describe the I LED concept using a systems perspective and propose practical interventions to be integrated within existing safety systems as an additional control to enhance resilience against human performance variability Provides a new view of total safety based on enhanced resilience provided through the integration of I LED interventions within existing safety systems Offers an in depth exploration of the phenomenon of spontaneous recall of past event leading to error detection and recovery of
