## **Managing The Probation Service:**

**Restructuring of the National Offender Management Service** Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2013-03-05 The National Offender Management Service directly manages 117 public prisons manages the contracts of 14 private prisons and is responsible for a prisoner population of around 86 000 It commissions and funds services from 35 probation trusts which oversee approximately 165 000 offenders serving community sentences For 2012 13 the Agency s budget is 3 401 million The Agency achieved its savings targets of 230 million in 2011 12 and maintained its overall performance despite an increase in the prison population However the Agency s savings targets of 246 million in 2012 13 262 million in 2013 14 and 145 million in 2014 15 are challenging The Agency believes it has scope to make the prison estate more efficient by closing older more expensive prisons and investing in new ones These plans however assume the prison population will stay at its current level Furthermore the Agency has not yet secured the up front funding for the voluntary redundancies needed to bring down prison staffing costs Unless overcrowding is addressed and staff continue to carry out offender management work it is increasingly likely that rehabilitation work needed to reduce the risk of prisoners reoffending will not be provided The Agency has not done enough to address the risks to safety decency and standards in prisons and in community services arising from staffing cuts implemented to meet financial targets The Agency plans to increase the role of private firms and the third sector in probation but the probation trusts don t appear to have the infrastructure and skills they need to commission probation services from these providers effectively

**The National Offender Management Information System** Great Britain: National Audit Office, 2009 The project s original aim of a single shared database of offenders will not be met though the number of databases used has been reduced from 220 to three The new system was to be introduced by January 2008 and was to cost 234 million to 2020 By July 2007 155 million had been spent on the project it was two years behind schedule and estimated lifetime project costs had risen to 690 million The project was halted while options to get the budget under control were sought The causes of the delays and cost overruns were inadequate management oversight significant underestimation of the project s technical complexity weak change control and absent budget monitoring The design of the main supplier contracts precluded pressure on suppliers to deliver to time and cost In January 2008 NOMS began work on a re scoped program with an estimated lifetime cost of 513 million and a delivery date of March 2011
