Managing Industrial Knowledge Creation Transfer And Utilization:

Managing Industrial Knowledge Ikujiro Nonaka, David J Teece, 2001-02-06 *Managing Industrial Knowledge* illuminates the complex processes at work in the creation and successful transfer of corporate knowledge. It is now generally recognized that the competitive advantages of firms depends on their ability to build, utilize and protect knowledge assets. In this volume many of the foremost international authors and pioneers of the study of knowledge in firms present their latest work and insights into organizational knowledge and innovation. In a world where markets, products, technologies, competitors, regulations and even societies change rapidly, continuous innovation and the knowledge that produces innovation have become key. The chapters in this keynote volume shed new light on the contextual factors in knowledge creation, the links between knowledge and innovation in all aspects of business life and the processes by which these may be fostered or lost in organizations. The Wiley Blackwell Handbook of the Psychology of Training, Development, and Performance Improvement

Kurt Kraiger, Jonathan Passmore, Nuno Rebelo dos Santos, Sigmar Malvezzi, 2020-06-02 This Handbook is sure to become a key resource for any researcher or professional looking for the latest and most innovative thinking from around the world on the full range of topics related to training, development and performance management. Bradford S Bell PhD Cornell University USA Editor Personnel Psychology. I wish I could have accessed this book many years ago. Comprehensive and scholarly, the four sections: training, e-learning, personal and professional development and performance management fit well together and address a gap in the literature that has been apparent for some time. The psychological perspective speaks to growing interest in the micro foundations of strategic success and the blending together of both formal and informal perspectives on learning in organizations ensures a holistic rather than piecemeal approach to the question of how to build individual knowledge, skills and competences in organizations. I believe that this book will make a significant impact on its target audience in this critical area. Helen Shipton Professor of International Human Resource Management Nottingham Trent University UK. The Wiley Blackwell Handbook of the Psychology of Training, Development and Performance Improvement provides up to date contemporary information for researchers and professionals by reviewing the latest literature and research in the interconnected fields of training, development and performance appraisal. It brings a psychological perspective to bear on a multidisciplinary field that links to management, human resources and education. Unique to reference works in this area, it maintains a truly global focus on the field with top international contributors looking at research and practice from around the world including South America, Europe, Canada and Australia as well as the United States and the United Kingdom. The chapters cover a diverse range of important contemporary topics such as needs analysis, job design, active learning, self-regulation, simulation, approaches, 360 degree feedback and virtual learning environments. Together they offer researchers and professionals essential information for building a talented organization, a critical and challenging task for organizational success in the twenty first century. **Knowledge and the Economy** Peter

Meusburger, Johannes Glückler, Martina Meskioui, 2013-05-23 The broad spectrum of topics surrounding what is termed the knowledge economy has attracted increasing attention from the scientific community in recent years The nature of knowledge intensive industries the spatiality of knowledge the role of proximity and distance in generating functional knowledge the transfer of knowledge via networks and the complex interplay between knowledge location and economic development are all live academic issues This book the fifth volume in Springer's Knowledge and Space series focuses on the last of these the multiple relationships between knowledge the economy and space It reflects the conceptual and methodological multidisciplinary emerging from this scholarship yet where there has up to now been a notable lack of communication between some of the contributing disciplines resulting in lexical and other confusions this volume brings concord and to foster interdisciplinarity These complications have been especially evident in our understanding of the spatiality of knowledge the part that spatial contexts play in knowledge creation and diffusion and the relevance of face to face contacts all of which are addressed in these pages The material here is grouped into four sections knowledge creation and economy knowledge and economic development knowledge and networks and knowledge and clusters It assembles new concepts and original empirical research from geography economics sociology international business relations and management The book addresses a varied audience interested in the historical and spatial foundations of the knowledge economy and is intended to bridge some of the gaps between the differing approaches to research on knowledge the economy and space
