**Managing Information Services** Jo Bryson, 2006 This new edition of *Managing Information Services* has been significantly revised and restructured to reflect the need for libraries and information services to manage the transformation necessary to become more relevant to the knowledge age's dynamic customer-centred environment. It reflects the move from managing physical assets to exploiting knowledge technology and innovation, new models of learning, global mobile communication and new delivery mechanisms with a focus on relationships. Introductory sections on management and strategic influences emphasise the importance of knowledge management skills, teamworking, corporate responsibility and customer satisfaction as a driver for change. A new section on corporate governance has been added that includes managing different forms of capital and there is expanded coverage of investment security, risk management and business continuity. Maintaining a competitive advantage through service quality and multiple delivery channels is another theme found throughout the book.
