Young, 2007-05-15 Written by experts and based on extensive research within risk management the focus of this publication is to re address the unique risks faced within a public sector environment These risks include the numerous legal social and political attributes not seen within the private sector This comprehensive overview of risk management in public organizations focuses upon the key issues within the field

Public Sector Risk Management Martin Fone, Peter C. Young, 2000-01-01 The management of risk is a fundamental purpose of government Whether risks arise from the physical environment the economic environment or even from changes in voter preferences public institutions have a broad responsibility to assess and address the risks that impact the community they serve and their organisation Public bodies are operating in a dynamic environment The imposition of a Best Value regime is forcing them not only to perform more efficiently effectively and responsively but also to develop best practices and benchmarking criteria to demonstrate their performance At the same time the ever increasing delegation of responsibilities from central government and the European Union has widened their exposure to risk Public institutions are now encouraged to partner with the private sector and outsource some of their traditionally retained services generating agency and delegation exposures In such an environment controlling the cost of risk has become a real priority But risk management is not just about preventing losses and reducing costs Increasingly risk management is defined as the co ordinated management of all risks This definition serves to encompass risk taking where it serves to meet overall organisational objectives This broader view of risk management known as organisation risk management asserts that risk management is a general management function that permeates an organisation is linked to the organisation s overall strategic plan and serves to enable the operational achievement of organisational goals and objectives Under this frame of reference risk management is not something a risk management department practices on a public body but rather an organisational value that informs and supports all managers and employees duties and activities Risk management is a central purpose of public institutions Public Sector Risk Management addresses the major challenges facing public bodies today and provides the basic tools necessary for implementing a risk management programme It introduces the subject of risk management through the development of a framework known as Organisation Risk Management ORM which establishes the premise of risk management as an organisation wide endeavour Readers will learn of the governing concepts and principles of ORM in the public sector but will also see how those concepts and principles translate into practice Various ready to use tools and techniques are provided which will enable readers to translate information into immediate use within their organisations Public Sector Risk Management is ideal for practising risk managers senior managers and elected members desiring an accessible but thorough introduction to the subject Provides a comprehensive framework for the management of Public Sector Risk Management Endorsed by The Institute of Risk Management IRM and by The Association of Local Authority Risk

In recent years a great deal of effort has been put into improving risk management in departments and in 2002 this was given further impetus when a two year risk programme was launched by the Prime Minister. This report looks at the progress made since the previous NAO report in 2000. HC 864 1999 2000 ISBN 0105569488. It is based on a survey of the 20 main Whitehall departments, focus groups of 27 departmental risk managers, comparisons with the private sector, academic research and five case studies. The general conclusion is that significant improvement has been made but more needs to be done to make effective risk management a central part of general management processes. The ability to take risks and innovate, keep projects on track and handle complex service delivery needs to be further developed.
