Manifolds With Group Actions And Elliptic Operators:

Manifolds with Group Actions and Elliptic Operators Vladimir Ilich Arnol'd, Yehuda Pinchover, 1994 This work studies equivariant linear second order elliptic operators \mathcal{P} on a connected noncompact manifold \mathcal{X} with a given action of a group \mathcal{G} . The action is assumed to be cocompact meaning that \mathcal{G} acts on \mathcal{X} for some compact subset \mathcal{V} of \mathcal{X} . The aim is to study the structure of the convex cone of all positive solutions of \mathcal{P} $u \geq 0$. *Moonshine, the Monster, and Related Topics* Chongying Dong, Geoffrey Mason, 1996 This is the proceedings of a Joint Summer Research Conference held at Mount Holyoke College in Jun 1994. As perhaps the first conference proceedings devoted exclusively to the subject known as Moonshine this work contains something for many mathematicians and physicists. Many of the results featured are not available elsewhere.

Pseudo-Differential Operators, Generalized Functions and Asymptotics Shahla Molahajloo, Stevan Pilipović, Joachim Toft, M. W. Wong, 2013-02-26 This volume consists of twenty peer reviewed papers from the special session on pseudodifferential operators and the special session on generalized functions and asymptotics at the Eighth Congress of ISAAC held at the Peoples Friendship University of Russia in Moscow on August 22-27 2011. The category of papers on pseudo differential operators contains such topics as elliptic operators assigned to diffeomorphisms of smooth manifolds, analysis on singular manifolds with edges, heat kernels and Green functions of sub-Laplacians on the Heisenberg group and Lie groups with more complexities than but closely related to the Heisenberg group, L^p boundedness of pseudo differential operators on the torus and pseudo differential operators related to time frequency analysis. The second group of papers contains various classes of distributions and algebras of generalized functions with applications in linear and nonlinear differential equations, initial value problems and boundary value problems, stochastic and Malliavin type differential equations. This second group of papers are related to the third collection of papers via the setting of Colombeau type spaces and algebras in which microlocal analysis is developed by means of techniques in asymptotics. The volume contains the synergies of the three areas treated and is a useful complement to volumes 155, 164, 172, 189, 205 and 213 published in the same series in respectively 2004, 2006, 2007, 2009, 2010 and 2011. *Differential Equations on Manifolds and Mathematical Physics* Vladimir M. Manuilov, Alexander S. Mishchenko, Vladimir E. Nazaikinskii, Bert-Wolfgang Schulze, Weiping Zhang, 2022-01-21. This is a volume originating from the Conference on Partial Differential Equations and Applications which was held in Moscow in November 2018 in memory of professor Boris Sternin and attracted more than a hundred participants from eighteen countries. The conference was mainly dedicated to partial differential equations on manifolds and their applications in mathematical physics, geometry, topology and complex analysis. The volume contains selected contributions by leading experts in these fields and presents the current state of the art in several areas of PDE. It will be of interest to researchers and graduate students specializing in partial differential equations, mathematical physics, topology and their

applications The readers will benefit from the interplay between these various areas of mathematics *Canadian Journal of Mathematics*, 1996 *Novikov Conjectures, Index Theorems, and Rigidity: Volume 1* Steven C. Ferry, Andrew Ranicki, Jonathan M. Rosenberg, London Mathematical Society, 1995-11-23 The Novikov Conjecture is the single most important unsolved problem in the topology of high dimensional non simply connected manifolds These volumes are the outgrowth of a conference held at the MathematischesForschungsinstitut Oberwolfach Germany in September 1993 on the subject of Novikov conjectures index theorems and rigidity *Partial Differential Equations* Donald Clayton Spencer, American Mathematical Society, 1973 *Index Theory for Invariant Elliptic Operators on Manifolds with Proper Cocompact Group Actions* Gong Cheng (Mathematician), 2018 In this thesis we study G invariant elliptic operators and in particular Dirac operators on the space of invariant sections of a Hermitian bundle over a non compact manifold with a proper and cocompact Lie group action We provide a canonical way to define the Hilbert space of invariant sections for proper and cocompact actions and prove that the G invariant Dirac operators and more generally elliptic operators are Fredholm for the Hilbert space we constructed Using the framework developed in this thesis we give a new proof of a generalized Lichnerowicz Vanishing Theorem for proper cocompact group actions as an application **Frontiers in Geometry and Topology** Paul M. N. Feehan, Lenhard L. Ng, Peter S. Ozsváth, 2024-07-19 This volume contains the proceedings of the summer school and research conference Frontiers in Geometry and Topology celebrating the sixtieth birthday of Tomasz Mrowka which was held from August 1-12 2022 at the Abdus Salam International Centre for Theoretical Physics ICTP The summer school featured ten lecturers and the research conference featured twenty three speakers covering a range of topics A common thread reflecting Mrowka's own work was the rich interplay among the fields of analysis geometry and topology Articles in this volume cover topics including knot theory the topology of three and four dimensional manifolds instanton monopole and Heegaard Floer homologies Khovanov homology and pseudoholomorphic curve theory *Infinite Dimensional Kähler Manifolds* Alan Huckleberry, Tilman Wurzbacher, 2001-09-01 Infinite dimensional manifolds Lie groups and algebras arise naturally in many areas of mathematics and physics Having been used mainly as a tool for the study of finite dimensional objects the emphasis has changed and they are now frequently studied for their own independent interest On the one hand this is a collection of closely related articles on infinite dimensional Kähler manifolds and associated group actions which grew out of a DMV Seminar on the same subject On the other hand it covers significantly more ground than was possible during the seminar in Oberwolfach and is in a certain sense intended as a systematic approach which ranges from the foundations of the subject to recent developments It should be accessible to doctoral students and as well researchers coming from a wide range of areas The initial chapters are devoted to a rather self-contained introduction to group actions on complex and symplectic manifolds and to Borel Weil theory in finite dimensions These are followed by a treatment of the basics of infinite dimensional Lie groups their actions and their

representations Finally a number of more specialized and advanced topics are discussed e g Borel Weil theory for loop groups aspects of the Virasoro algebra gauge group actions and determinant bundles and second quantization and the geometry of the infinite dimensional Grassmann manifold *Abstracts of Papers Presented to the American Mathematical Society* American Mathematical Society,1992 *JMSJ Nihon Sūgakkai*,2005 *Sūgaku Expositions* ,1998 **Russian Journal of Mathematical Physics** ,1994 **Notices of the American Mathematical Society** American Mathematical Society,1990 *Journal of the Faculty of Science, the University of Tokyo* ,1984 Proceedings of the Second Conference on Compact Transformation Groups Conference on Compact Transformation Groups,1972 **Aspects of Low Dimensional Manifolds** Yukio Matsumoto,Shigeyuki Morita,1992 This volume contains ten original papers written by leading experts in various areas of low dimensional topology The topics covered here are among those showing the most rapid progress in topology today knots and links three dimensional hyperbolic geometry conformally flat structures on three manifolds Floer homology and the geometry and topology of four manifolds Offering both original results and up to date survey papers Aspects of Low Dimensional Manifolds will interest mathematicians physicists graduate students and others seeking a good introduction to the field **Bulletin of the American Mathematical Society** ,1993 *The New Encyclopaedia Britannica* ,1981
