from 104 anorexics that challenges established opinion about what kind of people contract the disorder Writing from a sociological perspective the author asks if medical definitions of anorexia always reflect patients experiences and if the stereotype of the anorexic as a fat phobic middle class adolescent is genuinely supported by data By combining moving testimony in patients own words together with demographic findings and sociological comment the author demonstrates that all kinds of women from all sorts of backgrounds can and do develop anorexia The author offers a new perspective that demands a more inclusive definition of the disorder which reflects the moving accounts presented in this book She shows that the causes of anorexia are as varied as the patients who experience it     The Corsini Encyclopedia of Psychology, Volume 3 Irving B.
