Department of Agriculture and Immigration,1890      **More Christianity** Dwight Longenecker,2010 No one would dare to suggest that C S Lewis s Mere Christianity is anything less than a brilliant explanation and defense of the Faith But as robust wise and ardent as it is still it is incomplete It begins our banquet at the table of the Lord but doesn t take us all the way to the final course That is what Dwight Longenecker s new book More Christianity does It fills our plates with the fullness of the Christian Faith found only in the Catholic Church Lest someone think Longenecker is presuming to piggyback or cash in on Lewis work or to set himself up as Lewis successor that is not the case What he does and does brilliantly is present the doctrine of the Church with succinct explanations of topics that arise in Catholic Protestant discussion the Marian dogmas the papacy the Mass purgatory the communion of saints the rosary and more In Longenecker s skilled hands More

Eric D. Weitz,2015-04-27 Why did the twentieth century witness unprecedented organized genocide Can we learn why genocide is perpetrated by comparing different cases of genocide Is the Holocaust unique or does it share causes and features with other cases of state sponsored mass murder Can genocide be prevented Blending gripping narrative with trenchant analysis Eric Weitz investigates four of the twentieth century s major eruptions of genocide the Soviet Union under Stalin Nazi Germany Cambodia under the Khmer Rouge and the former Yugoslavia Drawing on historical sources as well as trial records memoirs novels and poems Weitz explains the prevalence of genocide in the twentieth century and shows how and why it became so systematic and deadly Weitz depicts the searing brutality of each genocide and traces its origins back to those most powerful categories of the modern world race and nation He demonstrates how in each of the cases a strong state pursuing utopia promoted a particular mix of extreme national and racial ideologies In moments of intense crisis these states targeted certain national and racial groups believing that only the annihilation of these enemies would enable the dominant group to flourish And in each instance large segments of the population were enticed to join in the often ritualistic

actions that destroyed their neighbors This book offers some of the most absorbing accounts ever written of the population purges forever associated with the names Stalin Hitler Pol Pot and Milosevic A controversial and richly textured comparison of these four modern cases it identifies the social and political forces that produce genocide     The Chronicle ,1883
