Minimalist Architecture Franco Bertoni, 2002-08 Minimalism as a concept was first used in the world of art to characterize the work of Donald Judd Sol Le Witt and several others Soon afterwards this creative approach began to take hold in architecture and the works of many contemporary architects are rooted in Minimalism to a greater or lesser degree This publication goes to the heart of this trend looking first at Loos Wittgenstein Mies van der Rohe and Asplund the definitive precursors of Minimalism Then the works of today's protagonists who include Tadao Ando Luis Barragán Alberto Campo Baeza A.G. Fronzoni Michael Gabellini John Pawson Claudio Silvestrin Eduardo Souto Moura and Peter Zumthor are covered extensively A selection of texts contributed by the featured architects conclude the volume With a clear even austere presentation this book not only reflects its contents but provides a comprehensive overview of Minimalism one of the dominant trends in contemporary architecture *Visual Merchandising* Louisa Iarocci, 2017-07-05 Situated at the crossroads of visual culture and consumerism this essay collection examines visual merchandising as both a business and an art It seeks to challenge that scholarly ambivalence that often celebrates the spectacle but denies the agenda of consumerism The volume considers strategies in the imaging of selling from the mid nineteenth century to the present in terms of the visual interaction that occurs between the commodity and the consumer and between body and space Under the categories of Promotion Product and Place contributors to the volume examine the strategies in the presentation of retail goods and environments that range from print advertising to product design to store display and architecture *Visual Merchandising The Image of Selling* is located directly at the nexus of business practice and cultural myth where the spectator never loses sight of their status as buyer and the object of desire is always still a commodity *Architecture and the City* Johann

Albrecht, 1988 **Contemporary Authors** Scot Peacock, 2002-05 Your students and users will find biographical information on approximately 300 modern writers in this volume of Contemporary Authors R **Forthcoming Books** Rose Army, 2004

Architecture Dan Cruickshank, 2000 Ten prominent architecture experts take a greatest hits approach to defining the major movements in western architectural styles technologies and philosophies Booklist *Minimalist Spaces* Arian Mostaedi, 2003 The absence of superfluous elements and the search for the greatest refinement in architecture and interior

design are the premises of the diverse proposals presented in this volume. Pure geometric forms, clear surfaces, repetition and a minimum number of compositional elements are the dominant aesthetic obsessions that can be observed in these works. This book offers practical examples and creative ideas for those seeking to create a home environment in line with one of the most important maxims of the century: Less is more.

Beyond the Minimal Peter Allison, Adolf Krischanitz, Architectural Association (Great Britain), ARTEC (Firm), Pauhof (Firm), 1998. *Beyond the Minimal* presents four of the most interesting practices in Austria today: Artec, Adolf Krischanitz, Pauhof and Riegler Riewe. Certain qualities of formal reduction are evident in the work of all four architects, but none of them equates minimalism with negation or absence in the sense that the term has been used in writings on architecture. They have been brought together because of the affinities in their approach, their common interest in materials, structure and the contribution of the building to the larger environment. Each practice is represented by a survey of around a dozen projects, including houses, schools, offices and exhibition pavilions. The survey is complemented by texts that link the work to broader developments in European, particularly Swiss, architecture.
