New Naturalist Londons Natural History:

London's Natural History (Collins New Naturalist Library, Book 3) R. S. R. Fitter, 2011-12-21 London's Natural History describes how the spread of man's activities has affected the plants and animals in them destroying some and creating others. This edition is exclusive to [newnaturalists.com](#) *London's Natural History (New Naturalist)*. R.S.R. Fitter, 1946 **London's natural History** Richard Sidney Richmond Fitter, 1946 [Nature in Towns and Cities \(Collins New Naturalist Library, Book 127\)](#) David Goode, 2014-10-23 The latest in the New Naturalist series documents the parks and green spaces unique to Britain's cities and the wildlife that has flourished in these habitats *The Aurelian Legacy - a History of British Butterflies and their Collectors* Michael Salmon, 2021-10-25 Although the collecting of butterflies is today an emotive subject it is impossible to separate a history of British butterflies from a history of their collectors without whose activities our knowledge of the identification, occurrence, distribution and variation of British butterflies would be much the poorer. Liberally laced with contemporary quotations this book brings to life the past three hundred years of butterfly study with details of early societies collecting equipment, biographies of 101 deceased lepidopterists with portraits where available as well as the chequered history in Britain of some 35 species of butterfly. The colour plates include some of the finest butterfly illustrations ever *London's Natural History* Richard Sidney Richmond Fitter, 1953 **A Nature Conservation Review: Volume 1** Derek Ratcliffe, 2012-01-26 This 1977 book analyses and describes the wild flora and fauna of Britain and identifies important sites that exemplify this rich heritage [Urban Environments - History, Biodiversity & Culture](#) Ian D. Rotherham, 2015 This volume is a retrospective publication of contributions originally to two national conferences seminars held in Sheffield on the theme of Urban Environments History Biodiversity and Culture. To the updated papers from those events we have added invited current contributions on the themes of urban nature and urban ecology. Ideas and issues in urban ecology become more significant as globalisation, urbanisation and cultural severance shape our world and our future ecologies. This is paralleled by increasing interest in the underpinning science and research paradigms in relation to urban environmental spaces. In the early 2000s ecologists new to the urban context suddenly became excited about the juxtaposition of pollution and biodiversity in degraded and contaminated sites something well known to urban ecologists and naturalists since the 1980s or earlier. Similarly the contributions of urban gardens to nature conservation were greeted with surprise and excitement [Catalogue of the Library of the Zoological Society of London](#) Zoological Society of London, Frederick Herschel Waterhouse, 1902 **Exploring Environmental History** T. C. The author's interests are multi-faceted and though often focussed on post 1600 Scotland by no means restricted to that area [Catalogue of the library of the Massachusetts Horticultural Society](#) Massachusetts Horticultural Society, 1918 **Science and the Garden** David S.

Freshwater Fishes in Britain Cynthia Davies,Jonathan Shelley,Paul Harding,Ian McLean,Ross Gardiner,Graeme Peirson,2021-10-25 For most British natural historians there is one vertebrate order that could well be said to be out of sight out of mind This is our freshwater fishes familiar principally only to anglers those concerned with managing rivers and other waterbodies and a few research scientists The results of this project which ran from 1998 2002 are published here in the form of comprehensive 10km square dot distribution maps for the 54 species inhabiting England Scotland Wales the Channel Islands and the Isle of Man These indicate the vulnerability of several of our native British species Following a wide ranging introductory chapter and further chapters on distribution and the history of the project Chapter 4 comprises the individual species accounts under

the headings Description Biology and behaviour Habitat Distribution in Britain World distribution Status Hybrids and related species and a final section of the relationship of each species with Man In addition to a map each species is illustrated by fine lithographs taken from Francis Day's famous 19th century work skilfully supplemented by Michael J Roberts for those species unknown to Day Chapter 5 covers conservation and management of freshwater fishes and is followed by four Appendices relating to 1 Publications 2 and 4 Selected websites relating to environmental protection biodiversity information and fish conservation The book concludes with a Glossary a comprehensive Bibliography and an Index In his Foreword Sir John Burnett Chairman of the National Biodiversity Network Trust commends this book as a unique reliable source of clear and comprehensive information that is pleasing both to the mind and to the eyes and expresses the hope that it will lead to the more effective conservation of this alien race in our midst A joint project of the Environment Agency the Centre for Ecology and Hydrology and the Joint Nature Conservation Committee written by a team of 38 authors and compiled and edited by Cynthia Davies CEH Jonathan Shelley EA Paul Harding Biological Records Centre CEH Ian McLean JNCC Ross Gardiner Fisheries Research Services and Graeme Peirson EA A History of Livestock and Wildlife Eric Jones, 2023-08-01

The use of wildlife products together with advances in livestock feeding were essential in propelling Western economic growth Extraordinarily these early modern and early industrial features are side lined relative to the role of manufacturing This book restores the balance detailing how many species were relocated around the world and how late natural products persisted into the age of synthetics This text describes how animals were driven immense distances to market and harnessed for transportation and to power machines even after industrialisation animals were employed for innumerable purposes besides being co opted as pets The recent rebound from a wholesale persecution of wild nature and how the plundering of the animal kingdom and the development of livestock farming jointly created the Smithian Growth that ushered in the Industrial Revolution are also described
