New Public Finance Responding To Global Challenges:

The New Public Finance Inge Kaul, Pedro Conceicao, 2006-02-23 Globalisation has meant the closer integration of countries and a greater need for collective action. This book, which contains 24 essays from contributors from around the world, provides one of the first systematic treatments of public finance in this new era. It deals with such topics as increasing aid efficiency, public private cooperation and competition, and taking the outside world into consideration.

Public Finance, Monetary Policy and Market Issues Edward Shinnick, 2008 Economies throughout both the developed and developing world are interconnected like never before, whether it is the financing of global challenges, monetary integration among a group of countries or trade across national borders. This increasing degree of interconnection brings both opportunities and challenges for the countries involved. This volume provides an analysis of three distinct but closely related themes of economic interconnection: Public Finance, Monetary Policy and Market Issues. The collection will stimulate further debate on these issues and, in doing so, will help to broaden the exchange of ideas among economists in both academia and business.
