## **New Religious World:**

**New Religions in Global Perspective** Peter B. Clarke, 2004-06-01 Peter B Clarke's in depth account explores the innovative character of new religious movements and new forms of spirituality from a global vantage point. Ranging from North America and Europe to Japan Latin America South Asia Africa and the Caribbean it is the perfect introduction to NRMs such as Falun Gong Aum Shikyo the Brahma Kumaris the Ikhwan or Muslim Brotherhood Sufism the Engaged Buddhist and Engaged Hindi movements Messianic Judaism and Rastafarianism. Charting the cultural significance and global impact of NRMs he discusses the ways in which various religious traditions are shaping rather than displacing each other's understanding of notions such as transcendence and faith good and evil of the meaning purpose and function of religion and of religious belonging. He then examines the responses of governments churches the media and general public to new religious movements as well as the reaction to older increasingly influential religions such as Buddhism and Islam in new geographical and cultural contexts. Taking into account the degree of continuity between old and new religions each chapter contains not only an account of the rise of the NRMs and new forms of spirituality in a particular region but also an overview of change in the regions mainstream religions.

Offers a discussion of the major controversies in which new religious movements have been involved using each profiled group to illustrate the nature of one of those controversies. Covers debates including what constitutes an authentic religion the validity of claims of brainwashing techniques the implications of experimentation with unconventional sexual practices and the deeply rooted cultural fears that cults engender. New sections include methods of studying new religions in each chapter as well as presentations on groups to watch.

**The Elementary Forms of the New Religious Life** Roy Wallis, 2019-03-19 This book first published in 1984 examines the whole range of new religious movements which appeared in the 1960s and 1970s in the West. It develops a wide ranging theory of these new religions which explains many of their major characteristics. Some of the movements are well known such as Scientology Krishna Consciousness and the Unification Church. Others such as the Process Meher Baba and 3 HO are much less known. While some became international others remained local in other ways too such as style belief organisation they exhibit enormous diversity. The movements studied here are classified under three ideal types world rejecting world affirming and world accommodating and from here the author develops a theory of the origins recruitment base characteristics and development patterns which they display. The book offers a critical exploration

of the theories of the new religions and analyses the highly contentious issue of whether they reflect the process of secularisation or whether they are a countervailing trend marking the resurgence of religion in the West     New Religious Movements: A Guide for the Perplexed Paul Oliver, 2012-02-02 Discusses the philosophical sociological and psychological themes in new religious movements and includes a survey and explanation of a few groups     *New Religious Movements in the Twenty-first Century* Phillip Charles Lucas, Thomas Robbins, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company     **Review of the World's Religious Congresses of the World's Congress Auxiliary of the World's Columbian Exposition** Lewis Pyle Mercer, 1893     *The Bloomsbury Companion to New Religious Movements* George D. Eck, 2009-03-17 Why Understanding America's Religious Landscape Is the Most Important Challenge Facing Us Today The 1990s saw the U S Navy commission its first Muslim chaplain and open its first mosque There are presently more than three hundred temples in Los Angeles home to the greatest variety of Buddhists in the world There are more American Muslims than there are American Episcopalians Jews or Presbyterians     *The Encyclopedia of World Religions* Robert S. the historical discipline as a whole Some critics declared it dead altogether Others have proposed a change of direction and a more or less exclusive focus on images and texts The most constructive proposals have suggested that labour history in the past concentrated too much on class and that other identities of working people should be taken into account to a larger extent than they had been previously such as gender religion and ethnicity Although class as a social category is still as valid as it has been before the questions now to be asked are to what extent non class identities shape working people s lives and mentalities and how these are linked with the class system In this volume some of the leading European historians of labour and the working classes address these questions Two non European scholars comment on their findings from an Indian resp American point of view The volume is rounded off by a most useful bibliography of recent studies in European labour history class gender religion and ethnicity

One of the significant advantages of New Religious World books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes.
