Modern projects are all about one group of people delivering benefits to others so it is no surprise that the human element is fundamental to project management. The *Gower Handbook of People in Project Management* is a complete guide to the human dimensions involved in projects. The book is a unique and rich compilation of over 60 chapters about project management roles and the people who sponsor, manage, deliver work in or are otherwise important to project success. It looks at the people issues that are specific to different sectors of organization: public, private and third sector; the organization of people in projects both real and virtual; the relationship between people, their roles and the project environment; and the human behaviours and skills associated with working collaboratively. Thus, this comprehensive and innovative handbook discusses all the important topics associated with employing, developing and managing people for successful projects. The contributors have been drawn from around the world and include experts ranging from practising managers to academics and advanced researchers. The Handbook is divided into six parts which begin with management and project organization and progress through to more advanced and emerging practices. It benefits hugely from Lindsay Scott's expert knowledge and experience in this field and from Dennis Lock's contributions and meticulous editing to ensure that the text and illustrations are always lucid and informative. *Gower Handbook of Programme Management* Dennis Lock, Reinhard Wagner, 2016-05-20

The Second Edition of this *Gower Handbook* is a completely new text designed as a definitive guide to the current state of Programme Management. To that end, the text offers foundation theory and knowledge around key issues such as managing programme contracts, people and how complexity and uncertainty, benefits and success measures as well as every stage of the programme life cycle. The main central section of the book provides theory, tools, advice and examples of practical application from an industry context and covers sectors including construction, energy, aerospace and defence, IT, automotive and the public sector. The Handbook also includes a section with chapters on assessing and improving programme competences and developing maturity.
