American Journal of Veterinary Research, 2017 Volumes for 1956 include selected papers from the proceedings of the American Veterinary Medical Association **A Manual For Laboratory Animal Management** Jonathan David Ward, 2008-10-21. Laboratory animal research remains a very important part of basic research and drug development. With the worldwide increase in biotechnology more and more researchers are required to use animals for research. However, many have basic or little training in experimental techniques or in the background information which remains very important. This book rectifies the problem by providing animal researchers and technicians with the essentials for conducting their work in the laboratory offering detailed protocols and information that can be referred to on a daily basis. Broadly covering a number

of important topics it draws attention to many of the techniques required to conduct animal research well and responsibly in order to obtain better experimental results **Practical Management of Research Animal Care and Use Programs**

Javier Guillén, Viola Galligioni, 2024-11-06 This book provides a complete guide to all the aspects to consider during planning establishing and managing ethically and efficiently research animal care and use programs taking into account all stakeholders involved in the process. Practical information on how to address the general and particular needs of all animal care and use program areas is provided. Consequently the reader is supported with getting their project ethically and legally compliant and implemented efficiently with organizing safe and appropriate facilities and equipment as well as hiring sufficiently trained personnel. Furthermore strategies for impactful internal and external communication are outlined. Responsible use of animals in research can be nothing but teamwork. The environment and professional experience of all involved stakeholders are the key for ensuring quality science as well as animal and personnel welfare. Research animal care and use programs represent a complex system in which animals legislation and good practices facility personnel and researchers interact on a daily basis. Thoughtful planning from the first step ensures animal welfare and improves the quality of in vivo experimentation. This book addresses animal program managers, veterinarians, researchers and technicians working in research animal facilities.
