Manet A New Realism:

Manet David Spence,1997 Discusses the life and works of the French painter
Theory Bridget Fowler,1997-04-08 This is the first comprehensive description of Pierre Bourdieu s theory of culture and habitus Within the wider intellectual context of Bourdieu s work this book provides a systematic reading of his assessment of the role of cultural capital in the production and consumption of symbolic goods Bridget Fowler outlines the key critical debates that inform Bourdieu s work She introduces his recent treatment of the rules of art explains the importance of his concept of capital economic and social symbolic and cultural and defines such key terms as habitus practice and strategy legitimate culture popular art and distinction The book focuses particularly on Bourdieu s account of the nature of capit

The Biography Book Daniel S. Burt,2001-02-28 From Marilyn to Mussolini people captivate people A E s Biography best selling autobiographies and biographical novels testify to the popularity of the genre But where does one begin Collected here are descriptions and evaluations of over 10 000 biographical works including books of fact and fiction biographies for young readers and documentaries and movies all based on the lives of over 500 historical figures from scientists and writers to political and military leaders to artists and musicians Each entry includes a brief profile autobiographical and primary sources and recommended works Short reviews describe the pertinent biographical works and offer insight into the qualities and special features of each title helping readers to find the best biographical material available on hundreds of fascinating individuals

Painting in a World Transformed William H. Libaw,2005-10-31 This book shows how painting since the mid 1800s has reflected Western society s mixed feelings about the transformations in our world produced by science and technology Neither a chronicle of the development of modern art nor a history of the modern era it instead discusses how artists have represented feelings and ideas about the technological changes of modern times Some artists approach this task with an outward focus representing the world they perceive Others focus inward choosing to represent their personal reactions to that world The author examines both approaches to show how major art movements of the last two centuries are related to the largest ever changes in human knowledge An analysis of 28 works reveals perceptions of technological change as both blessing and curse The result of this analysis is a fresh view of the major artworks of the past century and a half along with intriguing insights into our own attitudes towards our world

Claude Monet Virginia Spate,1992 Monet is incontestably one of the greatest Impressionists as well as being the most popular Yet hitherto books on this great figure have been partial

concentrating either on aesthetic or on social aspects of his work without attempting a synthesis Now Virginia Spate restores plenitude of meaning to Monet's paintings examining the various ways in which they can be read the tension between image and reality which energizes them and the mysterious interactions between the work itself its exhibition promotion and sale and its reception both in public and in private Based on a complete study of the artist's work made possible as never before by recently published catalogues of his oeuvre his surviving letters nearly 3 000 in all and contemporary documentary material this is the fullest account available of a complex and influential man whose style changed and evolved considerably during his long career Monet is considered as an intelligent and cultured being a friend to writers such as Zola Mallarmé and Octave Mirbeau fully informed as to the cultural and intellectual tendencies of his time His often neglected figure paintings always of family or friends are analyzed alongside his landscapes which ranged from timeless river scenes to steam filled railway stations Changes in his output in response to shifts in demand are linked to the new system of art dealers and to his financial situation The France of Monet's youth and maturity is covered in depth especially the traumatic legacy of the Franco Prussian war and the Paris Commune and his famous garden at Giverny is shown to be both a personal Utopia and a vital part of his creative processes The dialectic of the real world and its representation in art is explored in detail as manifested in his splendid canvases faithfully reproduced in over 130 colour plates This definitive treatment of a hugely important artist makes an indispensable contribution to the art history of Impressionism and the roots of modernism
