## **Manifest Power:**

Rethinking Power Thomas E. Wartenberg, 1992-01-01 A collection of 14 essays seven previously published analyzing the nature of power in society and personal lives The different perspectives and divergent conclusions share assumptions that power is important that previous analyses are inadequate and that the only reason to talk about it is in order to improve people's lives No index Paper edition unseen 16 95 Annotation c by Book News Inc Portland Or     Order and Might Nathan Rotenstreich, 2012-02-01 This is a systematic philosophy of politics and the state As few contemporary books do Order and Might provides a general theory exploring the structure of socio political experience It not only addresses such issues as the nature of freedom justice sovereignty and the relation between rights and obligations but also defines the systematic connections between them Rotenstreich relates political theory to history and morality and develops the theory through careful formulations of all of the traditional categories Without expounding the great political theorists this book is a continued conversation with them Plato and Aristotle Machiavelli and Hobbes Hegel and Marx Weber Berlin and Rawls

Dynamics of Organizational Change and Learning Jaap Boonstra, 2008-04-15 This handbook focuses on the complex processes and problems of organizational change and relates current knowledge of individual and group psychology to the understanding of the dynamics of change Complementary and competing insights are presented as overviews of theory and research Offers helpful insights about choosing models and methods in specific situations Chapters by international authors of the highest quality     The Causes of War David Sobek, 2013-04-25 Wars often spring out of nowhere with little warning One need only look at the recent troubles at the Lebanon Israeli border for evidence of this claim At other points in history such as the run up to the Second World War wars seem all but foretold How does one understand a phenomenon that at times seems so random while at others so predictable Is there an underlying cause of war and if so what is it In this book David Sobek argues that there is no single explanation for war factors leading to war in one case may well lead to peace in another Understanding the onset of war he contends requires a movement away from single theories towards one that embraces the multi faceted causes of war The characteristics of individual states the strategic interaction of multiple states and the broad structure of the international system all affect the risk of war Throughout the book Sobek draws on a wide range of examples from the rise of Japan in the 19th century to the emergence of Hamas in the 21st century to show how both domestic and international politics push states to or pull them from the brink of armed conflict While civil war and terrorism are often viewed as a form of violence distinct from interstate war Sobek examines them as simply an extreme form of asymmetric warfare From this perspective terrorism emerges as just another tactic used by actors engaged in armed conflict The Causes of War will be essential reading for students of security and strategic studies as well as anyone seeking to understand the rise of violent conflict in the contemporary world

**Marriage In A Culture Of Divorce** Karla Hackstaff, 1999-12-10 The experience of married life in different eras     **The Social Influence Processes** James T.

Tedeschi, 2017-07-12 Social psychologists have always been concerned with two person interactions and the factors enabling one person to gain dominance. Although social psychology has devised a revolutionary set of techniques to investigate the phenomenon of power, hypotheses are too often ambiguously stated. Research programs end in cul de sacs and experiments take on the character of one shot studies. In an attempt to stimulate new directions in research and to provide cumulative emphasis on the development of scientific theory in the area of power relations, Tedeschi has assembled original and path breaking essays from a dozen outstanding scholars and researchers in the behavioral sciences. More tightly integrated than leading books in the field of power relations, *The Social Influence Processes* focuses on two person interactions. A full explanation of the terms power and influence is followed by an analysis of the major variables in connections between two persons that must be taken into account in a scientific theory of social influence. The subsequent chapters respond to the categories established attempting a comprehensive construction of social reality and offering suggestions and techniques for measuring and ordering its complexity. Particular areas of research and theory are isolated for consideration in depth, such topics as personality as a power construct. *Power and Personality* by Henry L. Mintzberg, *Influence in Exchange Theory*, *The Tactical Use of Social Power* by Andrew Michener and Robert W. Suchner, and *Leadership through Charisma*. *Interpersonal Attraction and Social Influence* by Elaine Walster and Darcy Abrahams. In the final chapter, Tedeschi, Thomas Bonoma, and Barry R. Schlenker attempt to provide a general theory of social influence processes as they affect the target individual by reviewing the research literature in their own theoretical terms. This remarkable volume will be of interest to students as well.

DUNHAM, 1876      **Future Lost: A Cybernetic Sci-Fi Role Playing Game** Vincent Venturella, 2005-06-05 *Dark Future* is a science fiction sourcebook that gives players a chance to step into a possible future where America has fallen and immoral corporations have divided up a once great nation. The cities of the new corporate nations are divided further into large gated communities that shelter the wealthy and powerful behind high tech and heavily armed security. Meanwhile the poor are cast out into other cities, lawless ghettos where gangs, crime, and violence are a way of life. It contains 276 pages with 9 classes, 27 prestige classes, as well as new skills and skill uses, feats, original psychic powers, unique equipment, firearms, and complete new rules for cybernetic augmentation and cybernetic systems. The book also contains a world description of the powers that be: international corporations, merciless gangs, military research facilities, fanatical religious sects, and tyrannical government bodies.      Mind, 1898      **Principles of Decorative Design** Christopher Dresser, 1873      **Good Health**, 1898
