Grading NASA's Solar System Exploration

Program National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Assessing the Solar System Exploration Program, 2008-04-25 The NASA Authorization Act of 2005 directed the agency to ask the NRC to assess the performance of each division in the NASA Science directorate at five year intervals. In this connection NASA requested the NRC to review the progress the Planetary Exploration Division has made in implementing recommendations from previous relevant NRC studies. This book provides an assessment of NASA's progress in fulfilling those recommendations including an evaluation how well it is doing and of current trends. The book covers key science questions, flight missions, Mars exploration research and analysis, and enabling technologies. Recommendations are provided for those areas in particular need of improvement.

Civilized Life in the Universe George Basalla, 2006-01-19 From Plutarch and Kepler to Stephen Hawking and Carl Sagan this book offers a fascinating history of scientific speculation about life in outer space. Basalla traces an unbroken but twisting chain of ideas passed from one scientist to the next and from science to popular culture. He even examines the influence of popular culture on science. Sagan always admitted how much Burroughs' Martian novels influenced his speculations about Mars. Throughout Basalla shows that scientific belief in and search for extraterrestrial civilizations is a complex impulse part secularized religious and part anthropomorphic.
