New New Guinea:

Picturesque New Guinea J. W. Lindt,1887 *New Guinea* Clive Moore,2003-07-31 New Guinea the world's largest tropical island is a land of great contrasts ranging from small glaciers on its highest peaks to broad mangrove swamps in its lowlands and hundreds of smaller islands and coral atolls along its coasts Divided between two nations the island and its neighboring archipelagos form Indonesia's Papua Province or Irian Jaya and the independent nation of Papua New Guinea both former European colonies Most books on New Guinea have been guided by these and other divisions separating east from west prehistoric from historic precontact from postcontact colonial from postcolonial This is the first work to consider New Guinea and its 40 000 year history in its entirety The volume opens with a look at the Melanesian region and argues that interlocking exchange systems and associated human interchanges are the invisible government through which New Guinea societies operate Succeeding chapters review the history of encounters between outsiders and New Guinea's populations They consider the history of Malay involvement with New Guinea over the past two thousand years demonstrating the extent to which west New Guinea in particular was incorporated into Malay trading and raiding networks prior to Western contact The impact of colonial rule economic and social change World War II decolonization and independence are discussed in the final chapter

Van der Veur,1966 The paucity of published material on the borders of New Guinea and the international significance of the Irian boundary led me to bring together the information I had gathered over the past

few years Ideally a book of this kind should cover the subject in its total historical and geographical context The aim of this work is more modest it intends merely to throw some light on the birth and development of New Guinea's boundaries With this purpose in mind after an introductory chapter attention is given to the historical events leading up to the partition of New Guinea among three European powers In subsequent chapters the development of the boundaries between the various parts of the island is discussed It is realized that this approach may tend to convey the impression that each particular border is in some way unique This however is not intended and it is hoped that the reader will recognize some of the common underlying themes and problems which are given attention in the introductory and concluding chapters It was intended originally to present in a brief appendix those documents which define the borders It soon appeared desirable to include also the unpublished records of more recent border conferences and relevant correspondence leading up to the actual treaties exchange of notes Orders in Council or as the case might be lack of action *New Guinea Research Bulletin* Australian National University.
