New Patio Design:

New Patio Design Llorenç Bonet, 2005 The patio is an outdoor space situated within a house that can have a number of uses although in the past it served merely as a distributor of space for ventilating and illuminating the parts further away from the facade with natural light Nowadays architects have rethought this space and have adapted it to new uses even in regions with a cool climate and less tradition of living outdoors The sensation of spaciousness and good lighting acquired by a home giving on to a patio however small is one of the reasons why the latter has become more widespread The patio can also serve to separate the daytime area from the night time one or ensure that an outdoor space can be enjoyed free from prying eyes So the patio has become one more room in a house standing out from the others through its lack of roof and its primary function as a place intended for relaxation The Complete Guide to Patios Philip Schmidt, 2007 **Black &**
