## **New Thought Religion:**

*What Religious Science Teaches* Ernest Holmes, 2003 The thought of the ages has looked to the day when science and religion shall walk hand in hand through the visible to the invisible A movement that endeavors to unify the great conclusions of human experience must be kept free from personal ambitions and interpretation If science recognizes only a government of law whose principles are universal and religion becomes dogmatic and often superstitious when based on any one personality for Religious Science to exist the focus must insistently be on God ever present ever available In essence this was the primal message of the enlightened prophets of all the ages and this is the message of Religious Science What Religious Science Teaches is a summation of the Science of Mind theory that proclaims there is One Infinite Mind which of necessity includes all that is whether it be the intelligence in man the life in the animal or the invisible Presence which is God In it we learn to have a spiritual sense of things

**The Principles of New Thought** April Moncrieff, 2013 The roots of New Thought can be traced back to the early 1800 s and like any spiritual movement the interpretation and application of basic principles tend to evolve with society in a changing world From our vantage point in the 21st century we can see that despite the diverse path New Thought has taken its core beliefs continue to be a source of comfort for individuals seeking spiritual strength and encouragement What are these basic principles and why do they provide a long lasting spiritual foundation In **THE PRINCIPLES OF NEW THOUGHT** author April Moncrieff has answered this question and clarified the unique aspects of New Thought by explaining the Biblical and individual influences that sparked this spiritual way of life Not stopping there this intriguing book will make one realize that the philosophy actually dovetails more closely with Biblical teachings than many of today s traditional Christian groups Ernest Holmes was quoted as saying The Principles governing the New Thought movement are universal but individually and independently applied In other words even though the one True Source behind New Thought has forever been available the spiritual laws are useless without the acknowledgement and action of each and every soul Here s a new book that takes New Thought followers to the original roots of this world wide movement so they can understand and build a stronger spiritual life of their own

**Spirits in Rebellion** Charles Samuel Braden, 1963 [New Thought, or A Modern Religious Approach](#) Martin Alfred Larson, 2022-12-06 The renowned historian examines the evolution of the New Thought Movement from its eighteenth century European roots to twentieth century America In this enlightening study Martin A Larson presents New Thought as a rebellion against the conventional dogmas of Western religion He begins with an in depth look at the work of Emanuel Swedenborg the philosopher and Christian mystic who was compelled to publish his theological writing anonymously outside his native Sweden In the United States however the Shakers and their predecessors were able to avoid persecution despite setting forth a complete repudiation of traditional Christian doctrine They achieved this by accepting the Bible as divine revelation while denying its literal meaning Through the process of Spiritual Interpretation they supplanted orthodox religion with a totally new system of faith and belief This work is dedicated

to all those seeking truth in a religion that meets the needs of modern life The author pays special tribute to such forerunners as Michael Servetus Emanuel Swedenborg Phineas Quimby Warren Felt Evans Horatio W Dresser Ralph Waldo Trine Emma Curtis Hopkins Charles Fillmore Ernest S Holmes Thomas Troward Joseph Murphy and a host of others who have contributed to the movement known as New Thought a philosophy of health happiness and prosperity World Religions in America, Fourth Edition Jacob Neusner,2009-10-07 The fourth edition of World Religions in America continues its lauded tradition of providing students with reliable and nuanced information about America s religious diversity while also reflecting new developments and ideas Each chapter was updated to reflect important changes and events and current statistics and information New features include a timeline of key events and people for each tradition sidebars on major movements or controversies personal stories from members of various faiths a theme based organization of subjects more subheads three new chapters exploring America s increasing religious diversity and suggestions for further study *RELIGIOUS SCIENCE - The Fundamental Teachings of Ernest Holmes* Ernest Holmes,2019-04-21 Religious Science or Science of Mind was established by Ernest Holmes and it is a spiritual philosophical and metaphysical religious movement In general the term Science of Mind applies to the teachings while the term Religious Science applies to the organizations However adherents often use the terms interchangeably Content Creative Mind each soul must discover for himself that he stands in the midst of an eternal creative power which presses itself around his own thought and casts back to him glorified all that he thinks Creative Mind and Success is a spirited guide to mental wellness and business success The book provides answers for better comprehending the mind s creative power and explains how positive thinking can improve your life and help achieve prosperity and financial success The Science of Mind proposes a science with a new relationship between humans and God Holmes writing details how people can actively engage their mind in creating change throughout their lives Explanations of how to pray and meditate heal oneself spiritually find self confidence and express love led Holmes to believe Religious Science is a philosophy a faith and a way of life *Logical Faith* Joseph P. Provenzano,Richard W. Kropf,2007-07-30 Science has failed to develop ethical guidelines or a path to personal fulfillment as previously expected Religious differences continue to be a source of friction threatening world peace But now a new more encompassing vision of reality a vision that offers new ways to address these problems is emerging This evolutionary view presented by authors Joseph P Provenzano and Richard W Kropf builds on the findings of modern science but also touches on personal fulfillment and spiritual values In our worldwide computerized information age we have seen an unprecedented clash of moral values scientific pursuits religions spiritual movements and cultures Provenzano and Kropf explain how it is possible to have a religious faith consistent with the understanding of matter and energy as studied by contemporary science logical faith Logical Faith Introducing a Scientific View of Spirituality and Religion presents a clear down to earth formulation of an emerging vision Provenzano and Kropf show how their viewpoint can be used as a bridge between science and spirituality and as a base to develop a new path to

tolerance among the world's great religions and spiritual movements

### **The Teachings of Jesus** Glenn Edward

Chaffin, 2014-07-17 This book is about the teachings of Jesus not teachings about Jesus It is not even about what the New Thought movement teaches about Jesus It describes what Jesus taught about our place in the kingdom of God It does not attempt to incorporate Jesus's teachings into the body of New Thought principles nor does it attempt to explain the teachings of Jesus in New Thought terms It is not a metaphysical after thought but a new thought on the teachings of Jesus An uncommonly reasonable metaphysical interpretation of the teachings of Jesus this book was written for open minded seekers of Truth and wisdom as well as free thinkers of every denomination who have the courage to confront the challenge of a new thought It is dedicated to those students and to those who remember hearing the teachings of Jesus but have turned away from what was being taught These essays are intended for those who think that the teachings of Jesus cannot be reconciled with their spirituality their liberality and their rejection of religion This book is dedicated to those who have thrown the baby out with the bathwater Students of New Thought need not ignore the teachings of Jesus even though they have rejected the doctrines commonly associated with them While new thoughts on the teachings of Jesus may be uncommon these commentaries follow a common theme a fundamental truth of Jesus teachings oneness with God When read from that perspective one can make perfect sense of what Jesus taught Nevertheless as everyone's perspective is unique to themselves one person's views may appear rather peculiar to others Thus a new thought is always uncommon and must seem odd at first even when it is your own In this sense there can be no common sense where insights are considered There can be common books of prayers doctrines we hold in common with others agreements covenants and shared beliefs but inspiration will always be an uncommon awareness These essays are not a common sense commentary on the teachings of Jesus They are not only uncommon in their content but also in their lack of denominational precepts The common approach to Gospel commentary is an attempt to make sense of Jesus teachings from one's particular religious perspective which may explain why common sense is an uncommon thing in the field of religion and spirituality Even though most people search the teachings of Jesus for an endorsement of their denomination's theology that was not Jesus's intent He spoke to individuals in a way that required them to find the meaning of his words within themselves The Teachings of Jesus New Thoughts on the Gospels Principles Prayers and Parables facilitates this inner search whether one starts from the New Thought perspective or traditional Christianity This book does not speak on behalf of one denomination It addresses the search that everyone must make for themselves The intent herein is not to present well worn truths in support of anyone's religious beliefs nor used and abused truths or an explanation of how these truths can be used to justify beliefs doctrines and dogma The intention is to provide a new thought on eternal truths as expressed in the teachings of Jesus These truths are not new and some of the thoughts found in these essays echo statements by other much older thinkers of new thoughts However eternal truths never get old and they may be news to you The Truth is never a new idea but the inspiration it reveals is always a new thought

The Encyclopedia of World Religions Robert S. Ellwood, 2008 Contains nearly 600 brief entries on the world's religious traditions      Christian Science and the Catholic Faith Augustine Matthias Bellwald, 1922      **The Message of New Thought** Abel Leighton Allen, 1914      **Encyclopædia of Religion and Ethics: Mundas-Phrygians** James Hastings, John Alexander Selbie, 1917      **The Science Of Mind** Holmes Ernest S, 2023-07 The Science of Mind is a great book about spirituality that was written by a great spiritual guide In it Ernest Holmes talks about how our thoughts connect us to a creative law in the world He shows us how to put spiritual ideas into practice in our daily lives He shows how man can shape his own fate and decide what kind of life he wants to live He says that the mind of God and the mind of man are linked Since God's mind is infinite this means that man's mind has an infinite number of ways to show himself It's a book that anyone who wants to really understand ideas should read and study over and over again since it talks about many different religious and spiritual ideas It goes far beyond the simple goal of getting rich spilling over into ideas like God and the divine reason

*The Religion of a Modern Protestant* Charles Edward Herring, 1917      The Catholic Encyclopedia: Supplements 1 and 2 (loose-leaf) Charles George Herbermann, Edward Aloysius Pace, Condé Benoist Pallen, Thomas Joseph Shahan, John Joseph Wynne, 1922      **Religious Reconstruction** Minot Judson Savage, 1888      **Our Faith and the Facts**, 1927      **This Thing Called Life** Ernest Holmes, 2018-12-05 The great contribution of Ernest Holmes to modern thought is the specific form of meditation and prayer by which man can control outward conditions of his life instead of permitting conditions to control him Based soundly and thoughtfully upon the teachings of Jesus and other great spiritual leaders and philosophers THIS THING CALLED LIFE is an outline of the practice of Faith by which problems of every kind may be solved by every man and woman directly simply and effectively Recognised as one of the foremost teachers of religious science and philosophy since William James in this book Mr Holmes courageously declares that for centuries man has been putting the cart before the horse that he is not helpless in the face of poverty disease evil and unhappiness but that by this clear and simple system of thought and faith he can dominate them and introduce into his experience their exact opposites abundance health good and happiness If man will try and learn how to think writes Mr Holmes he can dominate his entire life and everything in and around it
