New Power Of Regions:

Regional Powers and Regional Orders Nadine Godehardt, Dirk Nabers, 2011-05-12 Regional Powers and Regional Orders presents a re examination and re conceptualization of the concept of region and its function within power and order systems Utilising a comparative and case study approach the volume examines new regional powers such as Brazil China India Russia and South Africa These territories as regional powers are novel phenomenon in the field of international politics and even more so in the field of international relations The book focuses on the emerging role of these new regional powers within their respective region and asks how other members of these regions cope with and react to that role Regional Powers and Regional Orders will be of interest to students and scholars of international and regional politics and power and international relations

Global and Regional Leadership of BRICS Countries Stephen Kingah, Cintia Quiliconi, 2015-11-17 This book presents a systematic collation of the regional and global dimensions of the leadership role of BRICS countries Brazil Russia India China and South Africa It analyses the rising regional and global leadership of BRICS using specific benchmarks to gauge the nature of this leadership The elements examined include willingness to lead the capacity to do as much and the degree to which the given actor is accepted as a leader both within and beyond its region The chapters in the book capture the nature of trends in regional and global leadership within the contexts of a changing international order It is taken for granted that Brazil Russia India China and South Africa are now engineering a unique pool of governance that is seeking alternatives to the current order of global economic and political affairs The fact that these countries have jointly decided to forge ahead with the BRICS constellation of states that is now taking consequential decisions such as the creation of the BRICS New Development Bank is not to be treated lightly In this book the majority of papers take a step back and systematically analyse the real state of the leadership that is provided by the BRICS on a litany of regionally and globally relevant issues While no one doubts the fact that these countries have the capacity to provide leadership especially in their various regions on many issues what remains moot is whether they are willing and capable to do so at the global level Even in those cases where there is the willingness and capacity the book argues that the acceptance of such leadership by potential followers is not always a given

Extra-regional Powers in Latin America in the 21st Century Ekaterina Kosevich, 2024-11-04 Latin America and the Caribbean LAC is a unique region with a sharply changing political and ideological orientation from a left turn to a right curve which means it is difficult to build stable and predictable international relations with the region At the beginning of the 21st century we witnessed a sharp increase in interest in LAC from extra regional powers that due to historical cultural and geographical factors traditionally did not have strong ties with the region The 2020s is a time of competitive and systemic rivalry when the value of each individual partnership union or alliance is increasing In this regard this wave of interest in LAC is not caused by a desire to expand trade and investment presence but by the desire of new actors in the Americas to use the region to gain greater global geopolitical influence This book

addresses the question What role do extra regional actors the US China the EU and Russia play in the new system of international relations formed in LAC at the beginning of the 21st century Ultimately the book opens up a new multilateral perspective on the role and place of LAC in global processes in the context of the interaction and confrontation between the worldviews of the West and the non West *U.S. Electricity Supply and Demand--the Northeastern Region* United States.
