New Reproductive Technologies Ethical Aspects:

New Reproductive Technologies Canada. Royal Commission on New Reproductive Technologies, 1993 The first paper in this volume of studies presents the ethical framework the Commission adopted a modified ethic of care and a set of guiding principles that were used as a prism through which to view the technologies The volume then goes on to explore some of the ethical issues raised by the development and use of new reproductive technologies *New reproductive technologies* ,1993 The first paper in this volume of studies presents the ethical framework the Commission adopted a modified ethic of care and a set of guiding principles that were used as a prism through which to view the technologies The volume then goes on to explore some of the ethical issues raised by the development and use of new reproductive technologies **Ethical Issues In The New Reproductive Technologies** Richard T. The Ethics of New Reproductive Technologies Dolores Dooley, Panagiota Dalla-Vorgia, Tina Garanis-Papadatos, Joan McCarthy, 2003-05-01 The new reproductive technologies NRTs have given rise to new ethical questions that are widely debated This book the outcome of a European Union wide collaborative process draws on the experience and expertise of ethicists lawyers and clinical practitioners and focuses on some of the burning issues in different European countries These include donor insemination surrogacy preimplantation genetic diagnosis embryo research access to IVF treatment and parental professional and social responsibility Familiar notions such as quality of life parenthood mothering responsibility and personal identity surface at many points throughout the book and are refashioned to accommodate new questions This book introduces and probes ethical questions and challenges in a hands on way by working through relevant case studies with key commentaries and activities It engages the reader directly in ethical reasoning and decision making and provides clear explanations insightful commentaries and informed debate on NRTs *Ethical Issues in the New Reproductive Technologies* ,2003 **Beyond Baby M** Dianne M. Bartels, Reinhard Priester, Dorothy E. Vawter, Arthur L.

Caplan, 2012-12-06 Arthur L Caplan It is commonly said especially when the subject is assisted reproduction that medical technology has out stripped our morality Yet as the essays in this volume make clear that is not an accurate assessment of the situation Medical technology has not overwhelmed our morality It would be more accurate to say that our society has not yet achieved consensus about the complex ethical issues that arise when medicine tries to assist those who seek its services in order to reproduce Nevertheless there is no shortage of ethical opinion about what we ought to do with respect to the use of surrogate mothers in vitro fertilization embryo transfer artificial insemination or fertility drugs Nor is it entirely accurate to describe assisted reproduction as technology The term technology carries with it connotations of machines buzzing and technicians scurrying about trying to control a vast array of equipment Yet most of the methods used to assist reproduction that are discussed in this volume do not involve exotic technologies or complicated hardware It is technique more than technology that dominates the field of assisted reproduction Efforts to help the infertile by means of the manipu

lation of human reproductive materials and organs date 1 2 Caplan back at least to Biblical times Human beings have engaged in all manner of sexual practices and manipulations in attempts to achieve reproduction when nature has balked at allowing life to begin

Legal and Ethical Issues in New Reproductive Technologies Canada. Royal Commission on New Reproductive Technologies, 1993 The four studies that comprise this volume are ostensibly about legal issues arising from the existence and use of new reproductive technologies At their base however they are about something much more fundamental how we define the rights and responsibilities attached to the concepts of motherhood fatherhood and families and what role we see the state as having in their regulation
