New Techniques In Sheep Production:

New Techniques in Sheep Production I. Fayed M. Marai, J.B. Owen, 2013-10-22 New Techniques in Sheep Production is an eight part book that first reviews sheep production systems and scope for improvement Subsequent chapter focuses on methods of increasing fecundity Parts III and IV describe reproduction methods and genetic improvement techniques Other chapters discuss breed development feeding systems management and health control and evaluation of techniques in sheep production This book will be of value to the pioneer farmers their advisers and supporters in the associated marketing and supply organizations as well as to students at agriculture and veterinary universities and colleges

Advances in Meat

Processing Technology Alaa El-Din A. Bekhit, 2017-09-29 Meat is a unique biological material with a central importance in nutrition and health Advances in Meat Processing Technology merges the expertise of meat scientists and food engineers in a holistic approach toward the processing of meat The meat industry strives to deliver consistent high quality and safe meat products Readers can benefit from knowledge generated by meat science researchers by achieving a greater understanding of the nature of meat and the engineering technology required for meat processing This book comprises 17 full chapters that provide up to date and fundamental information on current topics in meat processing This includes novel technologies such as the application of pulsed electric field meat stretching and shaping ultrasound and high pressure In addition analytical techniques such as Raman spectroscopy and NMR are enabling considerable advancement of knowledge in meat science and in meat processing Written by world renowned experts in their fields this contemporary collective work assembles the state of current knowledge that is of importance to both industry and academia

Reproductive Technologies in Farm Animals

Ian Gordon, 2004 In the past half century great progress has been made in the reproductive management of farm animals both mammals and birds This book aims to review developments and indicate which reproductive technologies can be used commercially or in research It begins by discussing artificial insemination and how this has recently been refined in semen sexing technology Embryo transfer in vitro embryo production technology and the control of oestrus and ovulation are then reviewed Subsequent chapters consider the control of postpartum ovarian activity seasonal breeding multiple births and litter size pregnancy testing parturition and the onset of puberty The author then describes more recent developments in cloning and the production of transgenic animals before a final chapter on suppressing reproductive activity
