Dystopia in Arabic Speculative Fiction Wessam Elmeligi, 2023-08-29 *Dystopia in Arabic Speculative Fiction: A Poetics of Distress* unpacks the nuanced Arabic contribution to speculative fiction. Part of a larger project by Elmeligi to formulate a poetics of literary theory to read Arabic literature, this book examines Arabic dystopian fiction from the lens of social causes of psychological distress. The selected novels combine works by authors already established in studies by Western scholars and many that have not been translated before or have not received enough scholarly attention yet. The novels represent an array of Arab countries including Algerian, Egyptian, Jordanian, Kuwaiti, Mauritanian, Syrian, and Tunisian authors. It also highlights the contribution of women authors to Arabic speculative fiction. This book enriches the conversation about what is quite possibly a significant speculative fiction turn in the Arabic novel, as well as provides a new theoretical approach to read such complex and innovative literature.

Dystopias and Utopias on Earth and Beyond Douglas A. Vakoch, 2021-04-29

Caught as we are in a grave climate crisis that seems more irreversible with every passing year our literary portrayals of the future often feature the dystopian collapse of the world as we know it Science fiction explores how we got here while pointing toward a more hopeful path forward From an ecofeminist perspective a core cause of our current ecological catastrophe is the patriarchal domination of nature playing out in parallel with the oppression of women As an alternative to dystopian futures that seem increasingly inevitable ecofeminist science fiction helps us conjure utopias that promote environmental sustainability based on more egalitarian human relationships

Dystopias and Utopias on Earth and Beyond Feminist Ecocriticism of Science Fiction explores the fictional worlds of such canonical novelists as Margaret Atwood Octavia Butler Ursula K Le Guin Doris Lessing and Joan Slonczewski as well as those of lesser known science fiction writers as they collectively probe humanity's greatest existential threats Contributors from five continents provide compelling analyses of far future dystopias on Earth that are all too easy to imagine becoming reality if humankind's current trajectory continues as well as provocative insights into science fiction utopias set on idyllic planets orbiting distant stars which offer liberatory alternatives that might someday be actualized in the real world By examining the links between the destruction of the environment and the domination of women Dystopias and Utopias on Earth and Beyond provides the tools to counteract those intertwined oppressions helping create a foundation for a truly habitable world

Science Fiction Robert Scholes,Eric S. Rabkin,1977 This is both an introduction to an overwhelming popular literary genre and a stimulating analysis of its literary social and scientific elements Contains detailed discussions of the most significant writers a nd of ten representative novels from 1818 to 1976 **The Criticism behind Gattaca's Genetic Apartheid Scenario** Myriam Nickels,2017-06-28 Seminar paper from the year 2016 in the subject English Language and Literature Studies Other grade 1 3 University of Koblenz Landau Anglistik language English abstract The new advances and tendencies in the application of genetic science evoke ethical social and legal concerns as the immense progress in genetics is a double edged sword On the one hand the completion of the Human Genome Project at the beginning of the 21st century and the recent progress in genetics come along with obvious benefits in genomic medicine such as better diagnosis of diseases and gene therapy However on the other hand the new genetics bring along worries that the new genetics could lead to a society that is less tolerant of disability and genetic diversity Moreover after successfully having intervened in the transformation of animals and plants to human s liking humans are now on the verge of manipulating the human genome so as to perfect the human species possibly since the necessary genetic technology is now available The movie Gattaca builds upon the scientific and technological advances in genetics in the late 20th century and displays a dystopian not too distant future In the portrayed future excessive genetic screening and embryo manipulation have brought about a rigidly hierarchical society grounded on genetic discrimination Undeniably there is an insurmountable social gap between these two classes Gattaca thoughtfully portrays the lives of different people trapped in these social categories and the special burdens they have to bear in such a society which is obsessed with genetic perfection A distinct two tiered society structure is the result of liberal eugenic practices and the unquestioned belief in genes being the determinants of an individual s life Niccol constructs a profoundly dystopian future which results from of the utopian quest to eradicate imperfections in society and genetically perfect humankind As Nicolas Pethes postulates science fiction possesses the possibility to prearrange real

science and to picture outcomes that have not yet happened 177 and to articulate the current cultural image of science 169
 Hence I read Gattaca as a genetic apartheid scenario to show how it comments on the advance in genetics in a critical way It
 is not possible to dismiss that the visions of the dystopian movie can be easily tied in with the contemporary genetic advances
