**Reproduction and Succession** Robin Fox,1993-01-01 The basis of this extraordinary effort is that all history is the history of reproduction and succession in other words of kinship. Fox claims that anthropology seems to have forgotten this while sociology never did grasp it getting bogged down in something called the family. Economics and psychology for their part were never much help in the pursuit of cultural universals. Reproduction and Succession is an attempt at a constructive approach from social and evolutionary science to law. Fox tackles Mormon polygamy the Baby M trials Sophocle's Antigone and the problem of the avunculate. It is a search for the universals that connect the rational search for law and the empirical search for anthropology

**In the Lap of the Gods and Other Short Stories** Vijay Naraidoo,2008 **Simon and Garfunkel Victoria** Kingston,1999-12

Paul Simon and Art Garfunkel had an almost unbroken series of bestselling hits that spoke to the heart of their times. With Simon's brilliant songs and Garfunkel's stirring voice, the duo produced the flawless harmonies that thrilled a generation. This in-depth biography follows the two musicians from their Queens childhood and early days as Tom and Jerry to their role in the evolving folk rock scene. Fame did not come quickly for the duo, but the surprise success of a remixed version of 'The Sounds of Silence' changed their lives. Victoria Kingston traces their ascent through the pop world as they produced such classics as 'Homeward Bound', 'The Boxer', and 'Bridge over Troubled Water'. When the director Mike Nichols approached them to create the songs for his film 'The Graduate', they recorded 'Mrs Robinson' for which they won the first of many Grammy Awards. Simon Garfunkel follows the duo through their breakup and subsequent solo careers, as well as through their legendary 1981 concert in Central Park and 1982 international reunion tour. **The Role of Play in Child Assessment and Intervention** Silvia Salcuni, Claudia Mazzeschi, Claudia Capella, 2017-09-06. Play is a ubiquitous and universal aspect of early childhood. Although it may take different forms throughout development and across cultures, decades of research have found play to be related to important positive outcomes. Play provides children with valuable cognitive, emotional, and interpersonal learning opportunities. It can act as a mode of communication for young children and allows them to practice ways of managing complex interpersonal interactions. Specific aspects of play, such as children's creativity in pretend play, have been associated with resilience and coping. The significance of play in childhood has led to its frequent use in the assessment of child development and in the implementation of child and parent, child psychological and educational interventions. Historically, however, the validity and efficacy of these interventions have not been rigorously evaluated. Further, few assessment and intervention models have included parents, teachers, and other key caregivers but have focused only on the child. This Research Topic will bring together the most current literature on the use of play in child assessment and intervention.
