Prairie School Federico Bucci,1998 A collection of essays and writings by the architects of the American Midwest prairie school style of architecture Between 1900 and the early 1920s a group of American architects active in the Midwest gave birth to an original movement the Prairie School Prairie in the literal sense but also as the symbol of the will to assert the values of an American culture free from European influence The Prairie School comprised talented architects such as Barry Byrne William Drummond George Elmslie Walter Burley Griffin Marion Mahony George Maher William Purcell and of course Louis Sullivan and Frank Lloyd Wright The essays and original writings by the architects will help to define the features of a school that imposed itself both locally and against the wider background of a frontier American culture based on democratic principles the relationship with nature and individualism Moreno Gentili. inglese Moreno Gentili,2001 Essays by Roberta Valtorta Agostinis Valentina **Istanbul, Constantinople, Byzantium** ,1997 Domus ,1995 **Europe Terminal : technological mutations** Moreno Gentili,2004 Space Food Armaments Biological Sciences Nuclear Energy Medicine Chemistry Pharmaceuticals Environment Human Resources and Computers are some of the areas that form part of Europe Terminal the photographic investigation begun by Moreno Gentili in 1992 The challenge was to get inside places of production that would not have been open to any photographer and often not even to an ordinary citizen qualities forming part of this investigation which has become like a performance lasting over ten years are the ability to pin point the place to be photographed to get into it and if necessary to change one s appearance so as to pass unnoticed The result is a series of pictures that individually could often conjure up a grotesque and chilling story and that in combination take us to places never seen yet very close to us Europe Terminal is an anti romantic project opposed to any kind of rhetoric presenting a view of two parallel worlds in one the wealth of the West increases letting a dangerous relationship emerge between development and consumption in the other we see the cross contamination between technology and human life as a necessary element for survival and even the bearer of a possible utopia The book sets out to take a clear sighted committed look at this ambivalence at the relationship between destruction and hope generated by technology in the continent where it originated BOOK JACKET **Joseph Beuys** Lucrezia De Domizio Durini,2007 This publication is the exhibition catalogue to a project which re present Beuys s Living Sculpture in Venice 30 years later and with present day developments the cultural environmental social economic humanitarian and political topics discussed by Beuys for 100 days at Documenta 6 in Kassel SPECIALIST **Contemporanea International Art Magazine** ,1988 **Ajfocus** ,1998 **The**

London Magazine ,1996 **Dress & Vanity Fair** ,2007 **Il parco** Marina Ballo Charmet,Gabi Scardi,2008

Photographer Marina Ballo Charmet has taken her camera on an artistic journey to city parks across the world including London New York Milan Paris Rome and Berlin Bringing a childlike simplicity to bear upon her subject Charmet manages to capture the uninhibited beauty of the park a space away from the congestion and density of the city where people s perceptions shift humanity relaxes and we take a break from the frenetic pace of daily life Coating Pirluigi Cerri,Pierluigi Cerri,1998 This study of product design provides a stimulating analysis of the similarities and differences in architecture and fashion How can the rapid transformation of fashion be reconciled with the stability of architecture Perhaps things were not always like this partly because historical distance makes us concentrate the Stylistic needs of a particular age into longer periods partly because the acceleration of change has become the main expressive means of present day society Fashion and social behaviour are significant materials that offer points of reference and content for the practice of architecture and visual arts This issue of Rassegna addresses the problem by comparing the reflections of some prominent thinkers on the subject from Georg Simmel at the end of the last century to Roland Barthes in the 1960s It will compare similarities and contrasts between architectural and fashion production through the study of product designs
