The lack of a diverse U S based pool of talent entering the field of engineering education has been termed a crisis by  
academic and political leaders Engineering remains one of the most sex segregated academic arenas the intersection of  
gendered and racialized exclusion results in very few Latina engineers Drawing on cutting edge scholarship in gender and  
Latino a studies the book provides an analytically incisive view of the experiences of Latina engineers Sponsored by the  
National Science Foundation through a Gender in Science and Engineering grant the authors bridge interdisciplinary  
perspectives to illuminate the nuanced and multiple exclusionary forces that shape the culture of engineering A large multi  
institution longitudinal dataset permits disaggregation by race and gender The authors rely on primary and secondary  
sources and incorporate an integrated mixed methods approach combining quantitative and qualitative data Together this  
analysis of the voices of Latina engineering majors breaks new ground in the literature on STEM education and provides an  
exemplar for future research on subpopulations in these fields This book is aimed at researchers who study

exclusion It will be attractive to scholars in the fields of multicultural and higher education sociology cultural anthropology
