in the writing these are the collected poems of W D Ehrhart one of the major figures in Vietnam War literature Arranged chronologically it allows readers to trace the development of a writer whose talents are bound together by the lingering physical psychological political and intellectual sensibilities the author first developed as a young enlisted Marine during the Vietnam War And while many of the poems deal with the author s encounter with the Vietnam War and its endless consequences the poems range widely in content from family and friends to nature and the environment to the blessings and absurdities of the human condition    **The Last Time I Dreamed About the War** Jean-Jacques Malo,2014-04-04 This is a collection of essays on the life and writing of W D Ehrhart poet essayist memoirist and teacher The twenty contributors

scholars publishers poets are from the U S France Britain the Netherlands Austria India and Japan Some are Vietnam or Iraq war veterans The collection overall studies various aspects of Ehrhart s writing as well as his direct influence on the lives of people both as a writer and as a teacher The volume concludes with a selection of Ehrhart poems chosen by the contributors because they embody some quality discussed in the essays The book includes a selected bibliography of Bill Ehrhart s

published writings    War, Literature, and the Arts ,1992    **Ordinary Lives** William Daniel Ehrhart,1999 In 1993 Ehrhart began what became a five year search for the men of his platoon Who were these men alongside whom he trained Why had they joined the Marines at a time when being sent to war was almost a certainty What do they think of the war and of the country that sent them to fight it What does the Corps mean to them What Ehrhart learned offers an extraordinary window into the complexities of the Vietnam Generation and the United States of America then and now    Images, Reality, and Digital Culture Krešimir Purgar,2025-09-30 Focusing on the moment of transition from the pictorial to the post pictorial condition this book advocates the opinion that what fundamentally distinguishes pictorial representation in Western civilization is one s ability to distinguish what the picture shows from what the picture refers to and to that extent the reality inside the picture cannot be confused with what is outside it The contributions in this book serve as kind of a missing link connecting the genealogy of traditional images with contemporary environmental visualizations in the world that in this very moment undergoes a transition into a new exciting age in which many old knowledges are rapidly becoming obsolete and new ones are seeking their legitimacy Instead of leading the reader to reconciliation with the fatal diagnosis of the world under the rule of technological determinism this book indicates the key points of transition between the pictorial representation that traditionally belonged to the history of art and the virtual presence that is approached in quite different ways today This book will be of interest to scholars working in art history image philosophy image studies and digital studies
