Ontological Commitment:

Fundamentals of Ontological Commitment Paolo Valore,2016-01-15 Scientific literature on particular themes in ontology is extremely abundant but it is often very hard for freshmen or sophomores to find a red thread between the various proposals This text is an opinionated introduction a preliminary text to research in ontology from the so called standard approach to ontological commitment that is from the particular point of view that connects ontological questions to quantificational questions It offers a survey of this viewpoint in ontology together with their possible applications through a broad array of examples and open problems and at the same time essential references to the classics of philosophy so as to allow non specialists to understand the terms and analysis procedures characterizing the discipline Its result is a wide ranging overview of the issued tackled by ontology with a particular focus on the most relevant problems of contemporary debate categorial taxonomies nonexistent objects case studies of ontological debates in specific fields of knowledge

Ontological Commitment Revisited Jesús Padilla Gálvez,2021-08-23 Ontological commitment implies that each theory is supposed to specify the type of entities that form its components Representatives of a theory share an ontological commitment in relation to the objects they refer to There are theories that admit the existence of universals while others do not As there are different ways of speaking about universals it is necessary to decide what a universal term corresponds to It is essential to have a criterion that enables us to decide which kinds of objects are allowed as references for the terms used In this volume two different approaches are discussed first in cases where only extensional languages are accepted second when intensional elements are required to determine the meaning such terms as Sachverhalt intentional statements or representations The ontological commitment associated with extensional theories exclusively admits the existence of physical objects whereas intensional theses additionally include universal and abstract entities The study of ontological commitment enables us to measure the ontological economy of theories This serves as a basis for the choice of theory The authors of this volume discuss relevant issues of both models and provide new solutions **Ontological Commitment** Richard H. Severens,1974 , The Ontology of the Analytic Tradition and Its Origins Jan Dejnozka,1996 The analytic movement advertised its linguistic turn as a radical break from the two thousand year old substance tradition But this is an illusion On the fundamental level of ontology there is enough reformulation and presupposition of traditional no entity without identity themes to analogize Frege Russell Wittgenstein and Quine to Aristotle as paradigmatic of modified realism Thus the pace of ontology is glacial Frege and Russell not Wittgenstein and Quine emerge as the true analytic progenitors of no entity without identity offering between them at least twenty nine private language arguments and sixty four no entity without identity theories *Ontology and the Semantic Web* Robert M. Colomb,2007 In order for information systems supporting two different organizations to interoperate there must be an agreement as to what the words mean There are many such agreements in place supporting information systems interoperation in many different application areas Most of these

agreements have been created as part of diverse systems development processes but since the advent of the Semantic Web in the late 1990s they have been studied as a kind of software artifact in their own right called an ontology or description of a shared world This book brings together developments from philosophy artificial intelligence and information systems to formulate a collection of functional requirements for ontology development Once the functional requirements are established the book looks at several ontology representation languages RDFS OWL Common Logic and Topic Maps to show how these languages support the functional requirements what deficiencies there are and how the languages relate to each other Besides a collection of running examples used throughout the book the entire treatment is supported by an extended example of a hypothetical ontology for the Olympic Games presented first as a set of chapter end exercises and then as a set of solutions which illustrate the various points made in the text in the context of a single coherent development **Proceedings of the 15th International Marine Design Conference** Austin A. Kana,2024-08-22 The 15th International Marine Design Conference IMDC 2024 was organized by the Department of Maritime and Transport Technology Delft University of Technology and was hosted by the Netherlands Defence Materiel Organisation at the Marine Etablissement Amsterdam MEA The aim of the IMDC is to promote all aspects of marine design as an engineering discipline The focus of IMDC 2024 is on the key design challenges and opportunities in the maritime field with special emphasis on the following themes Ship design methodology issues such as design spiral systems engineering set based design design optimisation concurrent design modular design configuration based design or fuzzy design aspects Novel marine design concepts such as hull form design transport ships service vessels naval vessels yachts and cruise ships or specialized and complex vessels Offshore design methodology such as applications to offshore wind turbines semi submersibles floating fish farms or floating cities Influence of energy transition on maritime design including both zero emission and high power and energy systems Influence of unmanned and autonomous transition on maritime design Influence of digital transition on maritime design such as digital shadows and twins model based systems engineering AI ML and big data Influence of regulations on maritime design Maritime design education **Conceptual Modeling for New Information Systems Technologies** Hiroshi Arisawa,Yahiko Kambayashi,2003-08-06 The objective of the workshops associated with ER 2001 the 20th International Con rence on Conceptual Modeling was to give participants the opportunity to present and discuss emerging hot topics thus adding new perspectives to conceptual modeling This the 20th ER conference the rst of the 21st century was also the rst one in Japan The conference was held on November 27 30 2001 at Yokohama National University with 192 participants from 31 countries ER 2001 encompasses the entire spectrum of c ceptual modeling from theoretical aspects to implementations including fundamentals applications and software engineering In particular ER 2001 emphasized e business and reengineering To meet this objective we selected the following four topics and planned four international workshops International Workshop on Conceptual Modeling of Human Organizational Social Aspects of Manufacturing Activities

HUMACS 2001 Manufacturing enterprises have to confront a host of demands The competitive climate enhanced by communication and knowledge sharing will require incr singly rapid responses to market forces Customer demands for higher quality better services and lower cost will force manufacturers to reach new levels of exibility and adaptability Sophisticated customers will demand products customized to meet their needs Industries have so far sought to cope with these challenges primarily through advances in traditional capital by installing more powerful hardware and software technology Attention to the role of humans combined with organizational and social schemes in manufacturing has only been marginal The workshop HUMACS 2001 aimed to challenge the relevance of this last point   Nominalism about Properties Ghislain Guigon,Gonzalo Rodriguez-Pereyra,2015-02-11 Nominalism which has its origins in the Middle Ages and continues into the Twenty First Century is the doctrine that there are no universals This book is unique in bringing together essays on the history of nominalism and essays that present a systematic discussion of nominalism It introduces the reader to the distinction between particulars and universals to the difficulties posed by this distinction and to the main motivations for the rejection of universals It also describes the main varieties of nominalism about properties and provides tools to understand how they developed in the history of Western Philosophy All essays are new and are written by experts on the topic and they advance the discussion about nominalism to a new level   **Ontological Commitment and Semantics** Jonathan Wolf Malino,1975   *Ontological Commitment, Quantification, and Ontology* Leroy Nelson Meyer,1975   **On what There is for Things to be** Stephan Krämer,2014 If Art is smart and Art is rich then someone is both smart and rich namely Art And if Art is smart and Bart is smart then Art is something that Bart is too namely smart The first claim involves first order quantification a generalization concerning what kinds of things there are The second involves second order quantification a generalization concerning what there is for things to be Or so it appears Following W V O Quine many philosophers have endorsed a thesis of Ontological Collapse about second order quantification They maintain that ultimately second order quantification reduces to first order quantification over sets or properties and therefore also carries the latter s distinctive ontological commitments In this revised version of his doctoral dissertation awarded the Wolfgang Stegmuller Prize in 2012 Stephan Kramer examines the major arguments for Ontological Collapse in detail and finds all of them wanting Quantifications he argues fall into at least two irreducible kinds those on what things there are and those on what there is for things to be   *Quine's Criterion of Ontological Commitment* A.
