book begins by looking at the background of China and the history and growth of railway development in China through five

key phases followed by assessing the cultural changes in the railway carriage and exploring how these are linked to social

equality and national provisions. The core of this book aims to analyse the Chinese urban transformation through the

development of the high speed rail HSR infrastructure in China. Eleven important new HSR stations in mainland China plus

the new Hong Kong West Kowloon Station have been selected to contextually explore how HSR infrastructures have affected

the development of the Chinese urban context. The selected case studies are the stations of Beijing South, Wuhan, Shanghai

Hongqiao, Guangzhou South, Xi'an North, Nanjing South, Chengdu East, Tianjin West, Zhengzhou East, Hangzhou East, and Hong

Kong West Kowloon. All of these were built between 2008 and 2018. In these case studies the location and the intentions and

success of promoting urban development are analysed and assessed. Following this the book further investigates the

peculiarities of the new HSR stations in China in comparison with stations in Europe. An assessment framework is established

to evaluate the Chinese case studies comparatively with significant cases in Europe attending to the urban structure of the
