## **Open Multithreaded Transactions:**

Open Multithreaded Transactions Jörg Kienzle, 2003-11-30 This book investigates how transactions can be integrated with concurrent object oriented programming and how transactions can be made available to an application programmer at the programming language level The book gives a detailed overview of existing transaction models and analyzes their suitability for concurrent programming languages A new transaction model named Open Multithreaded Transactions is presented It provides features for controlling and structuring not only access to objects as usual in transaction systems but also threads taking part in transactions Integration with exception handling makes open multithreaded transactions ideal building blocks for fault tolerant applications The book also describes the design of an object oriented framework providing the necessary run time support for open multithreaded transactions Procedural object oriented and aspect oriented interfaces for the application programmer are presented Programming examples include code in Ada Java and AspectJ

**Open Multithreaded Transactions** Jörg Kienzle, 2013-01-12      On The Move to Meaningful Internet Systems 2003: CoopIS, DOA, and ODBASE Zahir Tari, Douglas C. Schmidt, 2003-10-25 missions in fact also treat an envisaged mutual impact among them As for the 2002 edition in Irvine the organizers wanted to stimulate this cross pollination with a program of shared famous keynote speakers this year we got Sycara ble Soley and Mylopoulos and encouraged multiple attendance by providing authors with free access to another conference or workshop of their choice We received an even larger number of submissions than last year for the three conferences 360 in total and the workshops 170 in total Not only can we therefore again claim a measurable success in attracting a representative volume of scientific papers but such a harvest allowed the program committees of course to compose a high quality cross section of worldwide research in the areas covered In spite of the increased number of submissions the Program Chairs of the three main conferences decided to accept only approximately the same number of papers for presentation and publication as in 2002 i e around 1 paper out of every 4 5 submitted For the workshops the acceptance rate was about 1 in 2 Also for this reason we decided to separate the proceedings into two volumes with their own titles and we are grateful to Springer Verlag for their collaboration in producing these two books The reviewing process by the respective program committees was very professional and each paper in the main conferences was reviewed by at least three referees
