Enjoying the Operatic Voice: A Neuropsychanalytic Exploration of the Operatic Reception Experience Carlo

Zuccarini,2019-03-30 There has been a long standing and mutually informing association between psychoanalysis literature and the arts Surprisingly given the oral aural basis of the talking cure music has largely been overlooked by psychoanalysis Notably neuroscientific research investigating music reception and production has been steadily increasing in range and scope over the years However in order to avoid confounding factors empirical studies have focused primarily on non vocal music Remarkably operatic vocal music has not featured prominently in either field Yet the multi dimensional multi layered nature of opera which fuses together a number of different arts would appear to provide fertile soil for both disciplines This book aims to fill that gap providing a stepping stone for further research It leverages the individual strengths of psychoanalysis and neuroscience both separately and jointly as the inter discipline of neuropsychanalysis By combining various theories of mind with knowledge about music processing in the brain this book comprehensively examines the operatic reception experience providing an account in subjective as well as objective terms It explores the bittersweet enjoyment of operatic vocal music which can literally move an operaphile to tears The explanation for this may be found in a number of subjective dynamics that are unique to the reception of opera rather than in any distinct objective neural processes which are common to the reception of all music These subjective dynamics which are recruited during neural processing are triggered by the equally unique features of the operatic voice in combination with a number of auxiliary elements that are specific to opera This book will be of interest to academics in a broad range of science and arts disciplines related to music perception and performance such as music psychology and operatic performance It may also appeal to passionate operaphiles who wish to understand what drives their addiction
