**Equality and Public Policy** Paul Chaney, 2011-01-31 Equality of opportunity is a contested concept It evokes strong emotions from proponents and opponents alike Enduring issues of inequality and discrimination mean that it remains at the forefront of political priorities in the twenty first century Traditional analyses tend to focus on developments at the level of the unitary state or European Union In contrast this book underlines the salience of multi level governance and offers the first detailed comparative analysis of contemporary efforts to promote equality of opportunity in the wake of constitutional reform in the UK It presents a summary of social theory on equalities in relation to gender and a full range of social groups and identities such as disability ethnicity sexual orientation and age It outlines the contemporary evidence base relating to patterns and processes of inequality in the devolved nations A governance perspective is also advanced one that details how constitutional law establishing the devolved legislatures contains equality clauses that enable and empower government to promote equality in public policy and law Analysis reveals the development of distinctive regulatory structures and equalities policy lobbies in each territory Overall this volume charts the development of divergent legal rights and public policy on the promotion of equality in the wake of constitutional reform in the UK Notwithstanding ongoing challenges it is argued that the move to quasi federalism is significant for it marks a shift from the predominant centralised administration of social policy witnessed throughout the twentieth century to divergent approaches designed to address contrasting socio economic

Marsden, 2016-05-13 Today Scotland's history is frequently associated with the clarion call of political nationalism However in the nineteenth century the influence of history on Scottish national identity was far more ambiguous How then did ideas about the past shape Scottish identity in a period when union with England was all but unquestioned The activities of the antiquary Cosmo Innes 1798-1874 help us to address this question Innes was a prolific editor of medieval and early modern documents relating to Scotland's parliament legal system burghs universities aristocratic families and pre Reformation church Yet unlike scholars today he saw that editorial role in interventionist terms His source editions were artificial constructs that powerfully articulated his worldview and agendas emphasising Enlightenment inspired narratives of social progress and institutional development At the same time they used manuscript facsimiles and images of medieval architecture to foreground a romantic concern for the texture of past lives Innes operated within an elite associational culture which gave him access to the leading intellectuals and politicians of the day His representations of Scottish history therefore had significant influence and were put to work as commentaries on some of the major debates which exorcised Scotland's intelligentsia across the middle decades of the century This analysis of Innes's work with sources set within the intellectual context of the time and against the antiquarian activities of his contemporaries provides a window onto the ways in which the national past was perceived in Scotland during the nineteenth century This allows us to explore how historical thinkers negotiated the apparent dichotomies between Enlightenment and Romanticism whilst at the same time enabling a re-examination of prevailing assumptions about Scotland's supposed failure to maintain a viable national consciousness in the later 1800s      **Hansard's Parliamentary Debates** Great Britain.
