Opposition Planning In Wales And Appalachia:

Opposition Planning in Wales and Appalachia Pierre Clavel, 1983 **Fighting Back in Appalachia** Stephen Fisher, 2009 Citizen resistance and struggle in Appalachia since 1960 **Making Sense of Wales** Graham A S Day, 2002-07-30 Making Sense of Wales gives an account of the main changes that have taken place in Welsh society over the last fifty years as well as analysing the major efforts to interpret those changes By placing work done in Wales in the context of broader developments within sociological approaches over the period Graham Day demonstrates that there is a body of work on Wales worth considering in its own right as a specific contribution to sociology He also shows the relevance of sociological accounts of Wales for understanding contemporary empirical and theoretical concerns in social analysis Beginning with post war analysis which considered Wales in terms of regional planning and policy Day shows how more theoretically informed perspectives have come to the fore in recent years He also examines more contemporary developments such as gender and class transformations the emphasis on the centrality of the Welsh language for conceptions of Wales and Welshness as well as the impact of new forms of governance and questions of social exclusion **Appalachian Journal**, 2000 A regional studies review **The Appalachian Regional Commission** Michael Bradshaw, 2021-10-21 The images of poverty in Appalachia that John F Kennedy used in his campaign for the presidency in 1960 shocked and disturbed many Americans Five years later President Lyndon Johnson and the U S Congress demonstrated their commitment to that neglected and exploited region with the creation of the Appalachian Regional Commission In this insightful book Michael Bradshaw explores the ARC s unique federal state partnership and analyses in detail the contributions of the local development districts But this work is more than an analysis of a government agency it is as Bradshaw notes a book about an attempt to change the human geography of a large region of the United States by means of public policy Bradshaw offers important insights into the ARC s interactions with six administrations throughout its history The Reagan years were especially challenging during his eight years in office Reagan left the ARC out of his budget entirely but support from the state governors and Congress prevented closing of the Commission and maintained basic funding The bottom line for an agency such as the ARC is whether it has made any difference in the lives of the people of Appalachia Many would say their lives have been affected positively by the government funds that have been poured into the region but many others continue to question the ways in which the ARC was established and operated This is a book that should be read by any citizen who is interested in how to make government work effectively at all levels Nationality and Planning in Scotland and Wales Roderick Macdonald, Huw Thomas, 1997 This study looks at the ways in which the planning problems and approaches of Scotland and Wales are sometimes similar to and sometimes very different from each other and evaluates some central elements of planning and economic development urban and rural in the two countries **Can Neighbourhoods Save the City?** Frank Moulaert, Erik Swyngedouw, Flavia Martinelli, Sara Gonzalez, 2010-07-12 For decades neighbourhoods been

pivotal sites of social economic and political exclusion processes and civil society initiatives attempting bottom up strategies of re development and regeneration In many cases these efforts resulted in the creation of socially innovative organizations seeking to satisfy the basic human needs of deprived population groups to increase their political capabilities and to improve social interaction both internally and between the local communities the wider urban society and political world SINGOCOM Social INnovation GOVERNance and COMmunity building is the acronym of the EU funded project on which this book is based Sixteen case studies of socially innovative initiatives at the neighbourhood level were carried out in nine European cities of which ten are analysed in depth and presented here The book compares these efforts and their results and shows how grass roots initiatives alternative local movements and self organizing urban collectives are reshaping the urban scene in dynamic creative innovative and empowering ways It argues that such grass roots initiatives are vital for generating a socially cohesive urban condition that exists alongside the official state organized forms of urban governance The book is thus a major contribution to socio political literature as it seeks to overcome the duality between community development studies and strategies and the solidarity based making of a diverse society based upon the recognising and maintaining of citizenship rights It will be of particular interest to both students and researchers in the fields of urban studies social geography and political science
