Open Distributed Processing And Multimedia:

Open Distributed Processing and Multimedia Gordon Blair, Jean-Bernard Stefani, 1997 The need to support multimedia in Open Distributed Processing ODP environments is a major challenge when setting up distributed network systems This book has been written specifically to address the problems of supporting multimedia applications such as desktop conferencing multimedia email video on demand systems and virtual reality environments in ODP standards and platforms This book provides an introduction to the field of ODP with detailed descriptions of ISO s RM ODP OMG s CORBA and Open Group s DC a description of the requirements of distributed multimedia applications in terms of support for continuous media quality of service real time synchronization and multiparty communications an evaluation of these ODP platforms with respect to their support for multimedia a detailed description of an architecture for ODP standards and platforms supporting multimedia a description of two proof of concept demonstrators focusing on the programming model and on engineering support For information on Middleware 98 IFIP International Conference on Distributed Systems Platforms and Open Distributed Processing 15-18 September 1998 link to **Open Distributed Processing** Jan de Meer, Volker Heymer, Rudolf Roth, 1992 Open Distributed Processing is a central field in the standardization activities of ISO and CCITT This volume presents important cornerstones related to ODP an introduction to the ISO Basic Reference Model providing the framework for future standards in the area of ODP the architectural implications of ODP the methods and techniques to model information needs in enterprises a report on the CCITT studies on Intelligent Networks for new telecommunication services a report on the Telecommunication Information Networking Architecture Initiative for the synergy between computing and telecommunication and the fundamental concepts for object oriented design based on formal descriptions [Protocols and Systems for Interactive Distributed Multimedia](#) Fernando Boavida, Edmundo Heitor da Silva Monteiro, Joao Orvalho, 2003-08-02 This book constitutes the refereed proceedings of the Joint International Workshops on Interactive Distributed Multimedia Systems and Protocols for Multimedia Systems IDMS PROMS 2002 held in Coimbra Portugal in November 2002 The 30 revised full papers presented were carefully reviewed and selected from 112 submissions The papers are organized in topical sections on performance of protocols and applications mobile multimedia systems standards and related issues quality of service video systems and applications resource management and multimedia support **Third Generation Distributed Computing Environments** Amjad Umar, 2004 Umar provides a collection of powerful services to support the e business and m business initiatives of today and tomorrow Computer Books **Formal Methods for Distributed Processing** Howard Bowman, John Derrick, 2001-10-22 Originally published in 2002 this book presents techniques in the application of formal methods to object based distributed systems A major theme of the book is how to formally handle the requirements arising from OO distributed systems such as dynamic reconfiguration encapsulation subtyping inheritance and real time aspects These may be supported either by enhancing existing notations such as UML

LOTOS SDL and Z or by defining fresh notations such as Actors Pi calculus and Ambients The major specification notations and modelling techniques are introduced and compared by leading researchers The book also includes a description of approaches to the specification of non functional requirements and a discussion of security issues Researchers and practitioners in software design object oriented computing distributed systems and telecommunications systems will gain an appreciation of the relationships between the major areas of concerns and learn how the use of object oriented based formal methods provides workable solutions
