Open Source Software: New Horizons Pär J. Ågerfalk, Cornelia Boldyreff, Jesús M. González-Barahona, Gregory R. Madey, John Noll, 2010-05-10 This book constitutes the refereed proceedings of the 6th International IFIP WG 2.13 Conference on Open Source Systems OSS 2010 held in Notre Dame IN USA in May/June 2010. The 23 revised full papers presented together with 17 short papers, 5 workshop abstracts and 4 panel descriptions were carefully reviewed and selected from 51 submissions. The papers reflect the international communities of active OSS researchers and present a broad range of perspectives on open source systems ranging from software engineering through organizational issues to law. **AUUGN**, 1999-09-08 Librarians' Assessments of Automation Systems Marshall Breeding, Andromeda Yelton, American Library Association, 2011 Expert guides to library systems and services Cover **Multi-Disciplinary Advancement in Open Source Software and Processes** Koch, Stefan, 2011-03-31 This book reviews the development, design and use of free and open source software providing relevant topics of discussion for programmers as well as researchers in human computer studies, online and virtual collaboration and e-learning. Provided by publisher *Open-Source Technologies for Maximizing the Creation, Deployment, and Use of Digital Resources and Information* Hai-Jew, Shalin, 2012-10-31 Open source development has been around for decades with software developers co-creating tools and information systems for widespread use. With the development of open source software such as learning objects, interactive articles and educational games, the open source values and practices have slowly been adopted by those in education sectors. *Open Source Technologies for Maximizing the Creation, Deployment and Use of Digital Resources and Information* highlights the global importance of open source technologies in higher and general education. Written for those working in education and professional training, this collection of research explores a variety of issues related to open source in education such as its practical underpinnings, requisite cultural competence in global open source strategies for employing open source in online learning and research, the design of an open source networking laboratory and other endeavors. It aims to enhance workplace practices in harnessing open source resources in a time of budgetary frugality. Open Source Technology: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2014-11-30 The pervasiveness of and universal access to modern Information and Communication Technologies has enabled a popular new paradigm in the dissemination of information and ideas. Now instead of relying on a finite number of content providers to control the flow of information, users can generate and disseminate their own content for a wider audience. *Open Source Technology: Concepts, Methodologies, Tools, and Applications* investigates examples and methodologies in user-generated and freely accessible content available through electronic and online media. With applications in education, government, entertainment and more, the technologies explored in these volumes will provide a comprehensive reference for web designers, software developers and practitioners in a wide variety of fields and disciplines. □□□□, 1910 **Business 2.0**, 2002 **The Spectator**, 1910

Crowdsourcing. Essential Factors for successful Crowdsourcing in Product Innovation in Web 2.0 Sultan Özge Yaldiz, 2014-10-13 Bachelor Thesis from the year 2014 in the subject Business economics Offline Marketing and Online Marketing grade 1 3 Westfälische Hochschule Gelsenkirchen Bocholt Recklinghausen language English abstract At large innovation is a key factor for the success and persistence of organizations in today's business. In order to develop successful innovation information of two kinds is needed: information based on customers and the market's needs as well as information on how to transform the gained knowledge into corresponding products. Diener and Piller 2011: The paradigm of Crowdsourcing can be applied to obtain both kinds of essential information enabled through direct interaction with customers and takers providing an enhanced inflow of intelligence. The work at hand deals with Crowdsourcing and particularly crowd-based product innovation. Crowdsourcing is a relatively new conceptualized paradigm which is why the literature does not offer countless research papers on the topic and the market is not overloaded with companies applying the concept although the theory is very promising. Nonetheless, not all companies who have ventured the step towards Crowdsourcing have experienced positive outcomes; on the contrary, some encountered rants from the crowd as well as image losses. Papsdorf and Vo 2009: The first purpose of this work is to illustrate how broad the term Crowdsourcing is and what opportunities it offers for businesses by providing an overview of the common forms; a further purpose is to depict where, in what form, and how those activities take place. The cornerstones for a successful outcome are already set at the beginning of a project whereby this paper describes single decisions to make along a Crowdsourcing process and their influence on the project's course in order to understand how and why each decision during the process can be determining, thus marking a third purpose. The focus of this third purpose is on Crowd Innovation leading to the primary purpose, namely to identify and name essential factors for the success of a crowd product innovation project in Web 2.0. These factors will demonstrate which steps and rules have to be followed by a company to implement prosperous Crowdsourcing activities in this field.
