**Woman's Mysteries** Esther Harding,2017-03-07 Here is a classic study of the feminine principle in myths dreams and religious symbolism In presenting the archetypal foundations of feminine psychology the author shows how the ancient religious initiations of the moon goddess symbolized the development of the emotions Understanding the psychological meaning of these initiations she believes can help to heal the troubled relations between men and women today      Woman's Mysteries Esther Harding,2001-05-01 Here is a classic study of the feminine principle in myths dreams and religious symbolism In presenting the archetypal foundations of feminine psychology the author shows how the ancient religious initiations of the moon goddess symbolized the development of the emotions Understanding the psychological meaning of these initiations she believes can help to heal the troubled relations between men and women today      Cunningham's Book of Shadows Scott Cunningham,2024-11-06 A long lost Book of Shadows from an icon in the magical community featuring original spells rituals invocations and an herbal grimoire Wiccan readers will treasure this blast from the past as one final word from the revered teacher Library Journal Llewellyn is pleased to present a new Scott Cunningham book a long lost Book of Shadows Discovered in a battered manila envelope this previously unpublished manuscript was penned by Scott in the early 1980s This rare book includes original spells rituals invocations and an herbal grimoire Featured in the design are Scott's actual hand drawn signs symbols and runes More than twenty years after his passing Scott Cunningham is still an iconic and highly regarded figure in the magical community His books on Wicca are considered classics and his writings continue to inspire and inform those new to the Craft      The Freemason and Masonic Illustrated. A Weekly Record of Progress in Freemasonry ,1870      AI and Human Thought and Emotion Sam Freed,2019-07-11 The field of artificial intelligence AI has grown dramatically in recent decades from niche expert systems to the current myriad of deep machine learning applications that include personal assistants natural language interfaces and medical financial and traffic management systems This boom in AI engineering masks the fact that all current AI systems are based on two fundamental ideas mathematics logic and statistics from the 19th century and a grossly simplified understanding of biology mainly neurons as understood in 1943 This book explores other fundamental ideas that have the potential to make AI more anthropomorphic Most books on AI are technical and do not consider the humanities Most books in the humanities treat technology in a similar manner AI and Human Thought and Emotion however is about AI how academics researchers scientists and practitioners came to think about AI the way they do and how they can think about it afresh with a humanities based perspective The book walks a middle line to share insights between the humanities and technology It starts with philosophy and the history of ideas and goes all the way to usable algorithms Central to this work are the concepts of introspection which is how consciousness is viewed and consciousness which is accessible to humans as they reflect on their own experience The main argument of this

book is that AI based on introspection and emotion can produce more human like AI To discover the connections among emotion introspection and AI the book travels far from technology into the humanities and then returns with concrete examples of new algorithms At times philosophical historical and technical this exploration of human emotion and thinking poses questions and provides answers about the future of AI      "*Femininity*," "*masculinity*," and "*androgyny*" Mary Vetterling-Braggin,1982 To find more information about Rowman and Littlefield titles please visit [www rowmanlittlefield com](http://www.rowmanlittlefield.com)
