Myth Of The Paperless Office:

The Myth of the Paperless Office Abigail J. Sellen, Richard H. R. Harper, 2003-02-28 An examination of why paper continues to fill our offices and a proposal for better coordination of the paper and digital worlds Over the past thirty years many people have proclaimed the imminent arrival of the paperless office Yet even the World Wide Web which allows almost any computer to read and display another computer's documents has increased the amount of printing done The use of e-mail in an organization causes an average 40 percent increase in paper consumption In *The Myth of the Paperless Office* Abigail Sellen and Richard Harper use the study of paper as a way to understand the work that people do and the reasons they do it the way they do Using the tools of ethnography and cognitive psychology they look at paper use from the level of the individual up to that of organizational culture Central to Sellen and Harper's investigation is the concept of affordances the activities that an object allows or affords The physical properties of paper its being thin light porous opaque and flexible afford the human actions of grasping carrying folding writing and so on The concept of affordance allows them to compare the affordances of paper with those of existing digital devices They can then ask what kinds of devices or systems would make new kinds of activities possible or better support current activities The authors argue that paper will continue to play an important role in office life Rather than pursue the ideal of the paperless office we should work toward a future in which paper and electronic document tools work in concert and organizational processes make optimal use of both
